JOAN H. BARROW
Town Clerk
F.J. MATUSZEWSKI
Chief of Police

1. The Town has adopted the South Florida Building Code as a part of its building ordinances.
2. Building permits are issued for one year's duration. Construction must be started within 90 days or permit will be subject to revocation, with forfeiture of fee.
3. ALL changes in plans must be approved by the Building Department.
4. Work hours are 8: AM to 5: PM Monday thru Saturday. NO SUNDAY WORK.
5. Portable toilets must be on all construction sites.
6. Roof sheeting plywood must be 5/8" not 1/2" as in County.
7. Inspections are made Monday thru Friday, 8: AM to Noon. 24 hours notice is required prior to all inspections.
8. Rough grading and property clean-up must be completed before Certificate of Occupancy is issued.
9. Trash, debris and scrap building materials must be policed daily. All debris must be contained in a dumpster.
10. Building permit fee = \$5, per thousand of cost of building, plus \$10. for plumbing, \$10. for electric, \$10. for air conditioner and \$10. for roofing. For example, a \$50,000. building x \$5. = \$250. plus \$40. (pl. el., a.c. and roof) = \$290. total cost of permit.
11. The building department will request proof of contract costs.
12. Business or advertising signs on the job site will be permitted only with prior approval of the Town Commission.
13. If more than three trees are to be removed, replaced or relocated, a permit is required.
14. Submit separate square foot areas for inside walls, garages, carport, porches, etc..
15. Inside walls are calculated at \$40. per square foot minimum for building permit fee cost. All other areas are calculated at \$15. per square foot minimum.
16. Contractors must submit a manufacturer's window schedule with symbols and sizes.
17. Inspection for setbacks will be made by the building inspector if the builder supplies lines from the property stakes OR a survey showing the location of the building on the lot (by a licensed surveyor) will be required.

Plans approved as submitted _____ Plans approved as marked _____

I understand that this permit is good for 12 months from the date of its issue and that the structure must be completed in accordance with the approved plan. I further understand that approval of these plans in no way relieves me of complying with the Town of Sewall's Point Ordinances and the South Florida Building Code. Moreover, I understand that I am responsible for maintaining the construction site in a neat and orderly fashion; policing the area for trash, scrap building materials and other debris, such debris being gathered in one area and at least once a week, or oftener when necessary, removing same from the area and from the Town of Sewall's Point. Failure to comply may result in a Building Inspector or Town Commissioner "red-tacking" the construction project.

Contractor Jeffery J Pauly CBC04770

I understand that this structure must be in accordance with the approved plans and that it must comply with all code requirements of the Town of Sewall's Point before final approval by a Building Inspector will be given.

This Warranty Deed Made the 22nd day of February A.D. 1991 by
MADELEINE E. HENNEKE, an unremarried widow
hereinafter called the grantor, to
JOHN H. BORTLE and NANCY R. BORTLE, his wife
whose post office address is 2 Palmetto Drive, Stuart, FL 34996

hereinafter called the grantee:

(Wherever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives and assigns of individuals, and the successors and assigns of corporations)

Witnesseth: That the grantor, for and in consideration of the sum of \$ 10.00 and other valuable considerations, receipt whereof is hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto the grantee all that certain land situate in Martin County, State of Florida, viz:

Lot 17, PALMETTO PARK, according to the Plat thereof recorded in Plat Book 3, page 66, of the public records of Martin County, Florida.

SUBJECT TO restrictions, reservations and easements of record; and, all governmental zoning rules, regulations and ordinances.

Together, with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land, and hereby warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to December 31, 19 90 .

In Witness Whereof, the said grantor has signed and sealed these presents the day and year first above written.

ASPHALT ROOF

TAX FOLIO NO. _____ DATE _____

APPLICATION FOR A PERMIT TO BUILD A DOCK, FENCE, POOL, SOLAR HEATING DEVICE, SCREENED ENCLOSURE, GARAGE OR ANY OTHER STRUCTURE NOT A HOUSE OR A COMMERCIAL BUILDING.

3363

This application must be accompanied by three (3) sets of complete plans, to scale, including a plot plan showing set-backs; plumbing and electrical layouts, if applicable, and at least two (2) elevations, as applicable.

Owner John Bortle Present Address 2 Palmetto Pk.

Phone 223 5837

Contractor Rai Brown Address 3375 SW 78 Palm city

Phone 283 5570

Where licensed Martin Co License Number SP 00129

Electrical Contractor _____ License Number _____

Plumbing Contractor _____ License Number _____

Describe the structure, or addition or alteration to an existing structure, for which this permit is sought: Roofs Asphalt

State the street address at which the proposed structure will be built: _____

Subdivision Palmetto Lot Number 17 Block Number _____

Contract Price \$ 4000.00 Cost of Permit \$ 100.00

Plans approved as submitted _____ Plans approved as marked _____

I understand that this permit is good for 12 months from the date of its issue and that the structure must be completed in accordance with the approved plan. I further understand that approval of these plans in no way relieves me of complying with the Town of Sewall's Point Ordinances and the South Florida Building Code. Moreover, I understand that I am responsible for maintaining the construction site in a neat and orderly fashion, policing the area for trash, scrap building materials and other debris, such debris being gathered in one area and at least once a week, or oftener when necessary, removing same from the area and from the Town of Sewall's Point. Failure to comply may result in a Building Inspector of Town Commissioner "Red-Tagging" the construction project.

Contractor John Bortle

I understand that this structure must be in accordance with the approved plans and that it must comply with all code requirements of the Town of Sewall's Point before final approval by a Building Inspector will be given.

Owner John Bortle

DEVELOPMENT ORDER # _____

1. ALL APPLICATIONS REQUIRE :

- A. Property Appraiser's Parcel Number.
- B. A Legal Description of your property. (Can be found on your deed survey or Tax Bill.)
- C. Contractor's name, address, phone number & license numbers.
- D. Name all sub-contractors (properly licensed).
- E. Current Survey
- F. Take completed application to the Permits and Inspections Office for approval. Provide construction details and a plot plan(s) showing setbacks, yard coverage, parking and position of all buildings on the property, stormwater retention plan, etc. Compliance with subdivision regulations can also be determined at this time.
3. Take the application showing Zoning approval (complete with plans & plot plan) to the Health Department for septic tank. Attach the pink copy to the building application.
4. Return all forms to the Permits and Inspection Office. All planned construction requires: two (2) sets of plans, drawn to scale with engineer's or architect's seal and the following items:

1. Floor Plan
2. Foundation Details
3. Elevation Views - Elevation Certificate due after slab inspection.
4. A Plot Plan (show desired floor elevation relative to Sea Level in front of building, plus location of driveway).
5. Truss layout
6. Vertical Wall Sections (one detail for each wall that is different)
7. Fireplace drawing: If prefabricated submit manufacturers data.

ADDITIONAL Required Documents are:

1. Use Permit (for driveway connection to public Right of Way). Return form with plot plan showing driveway location (Atlantic Ave. only).
2. Well Permit or information on existing well & pump.
3. Flood Hazard Elevation (if applicable).
4. Energy Code Compliance Certification plus any Approved Forms and/or Energy Code Compliance Sheets.
5. Statement of Fact (for Homeowner Builder), and proof of ownership - (Deed or Tax receipt).
6. Irrigation Sprinkler System layout showing location of heads, valves, etc.
7. A certified copy of the Notice of Commencement must be filed in this office and posted at the job site prior to the first inspection.
9. Replat required upon completion of slab or footing inspection and prior to any further inspections.

NOTICE: In addition to the requirements of this permit, there may be additional restrictions applicable to this property that may be found in the public records of COUNTY OF MARTIN, and there may be additional permits required from other governmental entities such as water management districts, state and federal agencies.

Approved by Building Official _____

Approved by Town Engineer _____

Super Span™ Heavy Gauge Premium Vinyl Soffit

More than 20% thicker than ordinary soffit, so it's perfect for entrances, porch ceilings and other extended overhangs. A deep V-groove, 5" exposure and a subtle natural grain texture create maximum visual appeal. Available in solid and vented panels. Solid panels can be used to create bold vertical siding installations.

Product specifics

Profile: V-groove, solid and aerated
 Exposure: Double 5"
 Butt edge: 3/8"
 Thickness: 0.044"
 Texture: Subtle grain, low-gloss finish
 Colors: 11 — see page 13 for details.
 Aerated provides 7 sq. in. net free area/lineal ft.

Series E™ Premium Vinyl Soffit

The two panels in this popular line offer deep V-groove profiles, 4" exposure widths and a choice of either solid or vented panel designs. Solid panels can be used for vertical siding installations. Two surface finishes are available:

Series E Grained Premium Vinyl Soffit™ features a natural wood grain texture. For maximum color-matching flexibility, it's available in 14 colors. Vented panel feature a full-width "outward weave" design that maximizes visual appeal.

Series E Smooth Premium Vinyl Soffit™ is made with a beautiful matte texture and low-gloss finish that coordinates easily with all sidings. Available in white only. Center vented panels use an attractive "outward weave" design.

Series E product specifics

Grained
 Profile: V-groove, solid and fully aerated
 Exposure: Triple 4"
 Butt edge: 1/2"
 Thickness: 0.040"
 Texture: Detailed grain, low-gloss finish
 Colors: 14 — see page 13 for details.
 Aerated provides 7 sq. in. net free area/lineal ft.

Smooth
 Profile: V-groove, solid and center aerated
 Exposure: Triple 4"
 Butt edge: 1/2"
 Thickness: 0.040"
 Texture: Smooth, low-gloss finish
 Colors: White only
 Aerated provides 2.3 sq. in. net free area/lineal ft.

Section 4: Installing Soffit and Porch Ceilings

The underside of an eave is a tough spot to paint or clean. That's why homeowners are turning to easy-care vinyl soffit to simplify their home maintenance chores. Vinyl soffit offers another major benefit to homeowners. Because it's available in both solid and vented panels, it gives them a convenient, attractive way to provide air flow needed to help keep attics cool and dry.

TIP: Here's a formula you can use to estimate the number of vented panels you'll need for a project:

1. Calculate the square footage of the attic floor. Then divide that number by 2. The answer equals the approximate total net free area — in square inches — required for adequate ventilation. Because total net free area must be divided between intake vents (usually located in eaves) and exhaust vents (usually located at or near the roof peak), divide by 2 again to determine how much soffit venting you'll need.
2. To determine the number of vented panels required, divide the answer from Step 1 by the net free area provided by a single vented panel. Here's the approximate net free area for Alside soffit panels: Charter Oak™ — 39 sq. in. net free area per panel. Greenbriar Beaded™ — 40 sq. in. Super Span™ — 84 sq. in. Series E™ (fully vented) — 88 sq. in. Series E™ (center vented) — 29 sq. in. 2T — 88 sq. in.

For example, a house with a 60' x 30' attic area (1,800 sq. ft.) would require about 900 sq. in. of net free area. Half of that, or 450 sq. in., would be vented soffit. If you were using Charter Oak soffit, you would need 12 vented panels ($450/39=11.5$ or 12 full panels).

Remember, however, this formula is just a rough estimate. Most communities have specific building code requirements covering attic ventilation. Before ordering soffit panels, **check your local codes**. If those requirements differ from the rough guidelines given above, be sure to adapt your calculations to conform to local requirements.

The steps you'll follow to install soffit panels are determined by whether you're working with open or enclosed eaves.

4.1 Installing soffit over open eaves.

If you're working on a home under construction, you're probably dealing with open eaves (the rafters or trusses are exposed). If you're working on a remodeling project and the existing soffit material must be removed, you'll have to use open eave installation techniques too.

Start by determining the construction method used to form the eave. (The construction method determines the procedures used to install the soffit.) Use the illustrations on this page as a guide.

Install receiving channels (J-channel, F-channel, soffit crown molding or coil-formed channel) as shown in the illustrations.

If using J-channel or F-channel, nail channels every 16", positioning nails in the center of the nailing slot. (All fastening recommendations for siding installations also should be followed for soffit installations. See page 14.)

If using soffit crown molding, you must first install siding panels. Next hang the soffit crown molding from the framing. (If no framing support exists, install a 2" x 2" nailing strip to the wall, positioning it so its bottom edge is even with the bottom of the fascia board. Nail molding along bottom of nailing strip.) See illustration for a detailed view of the completed installation.

TIP: To overlap soffit crown molding, cut 1 1/2" notches in the receiving channel and bottom return of both pieces, as shown in illustration. Overlap 1".

If the eave opening is wider than 24", add framing and nailing strips as shown.

If the soffit installation will turn a corner, install H-trim. Measure the distance between receiving channels at inside and outside wall corners, then subtract $\frac{1}{4}$ ". Cut H-trim to length and install (see illustration). (If necessary, use a nailing strip to support the H-trim.)

To install soffit panels, first measure from wall to fascia board, then subtract $\frac{1}{2}$ ". Cut the panels to this length. (Check this measurement every couple of feet.) Slip soffit panels into receiving channels on wall, then receiving channels at fascia. (You may have to flex the panels slightly to do this.) Position panels so they're perpendicular to the wall, then nail — either to fascia board or nailing strip. Be sure panel being installed is fully locked with previously installed panel.

TIP: The type of eave construction you're working with also determines how you'll position and nail soffit panels. If you're using a nailing strip, position the soffit so there's room for expansion and contraction in each receiving channel. Position nails in the center of the nailing slot; do not nail tightly. If you're attaching panels at the fascia board, drive small-headed nails through the nail flange. Because you're face nailing, you have to allow for all expansion to take place at the inside receiving channel.

If the soffit turns a corner at a 90° , measure the long side of the panel, from wall to H-trim, then subtract $\frac{1}{2}$ ". Make a 45° cut, fit in H-trim, then install as described above.

4.2 Installing soffit over enclosed eaves.

This is the type of eave construction you commonly find on a remodeling project: the existing soffit material is still in place. For the most part, the installation procedure is similar to that for open eaves, with the following exceptions:

Determine what type of receiving channel you'll use at the fascia board. If you're using a channel formed from coil stock, you'll have to add a nailing strip at the wall line, then apply J-channel (see illustration). If you're using J-channel, install both outside and inside pieces. For both installation methods, nail J-channels every 6" to 12".

If necessary, cut openings in existing soffit for new vented soffit panels. Make sure openings are large enough to allow desired air flow.

If soffit installation turns a corner, install inner and outer J-channels to allow 1/4" expansion along the adjoining walls and fascia boards.

Measure, cut and install panels as described in the section covering open eaves.

4.3 Installing porch ceilings.

The steps required to install a porch ceiling differ depending on whether the project is new construction or remodeling.

TIP: We recommend that all porch ceilings be installed perpendicular to siding panels. By working at a right angle to the wall, you can constantly adjust the width of ceiling panels to allow for irregularities in wall construction. However, if you install ceiling panels parallel to the wall, you'll have to scribe the panels installed along the wall and the outer perimeter of the porch to assure an exact fit. You'll also have to create tabs every 8" to 10" and install finish trim. If you don't, panels could come loose during high winds.

New construction installations. Think of a porch ceiling installation as a siding installation in a vertical plane. The techniques and procedures involved are almost identical.

Install receiving channels along the perimeter of the porch. F-channels are nailed to the wall. J-channels require a nailing base. To create that base, nail 1 x 2 furring strips along the perimeter as required, then nail inverted J-channels to the furring.

If the porch ceiling exceeds 6', install a suitable underlayment. This will help reduce noise and vibrations (and the possibility of panel unlocking) that could result during high winds.

Plan the ceiling layout with two considerations in mind:

First, how will you create a balanced look for the ceiling? As with vertical siding installations, you may have to cut partial panels so one end of the ceiling doesn't end with an extremely narrow panel.

Second, will the ceiling panels run parallel or perpendicular to the ceiling joists? If the panels will run parallel to the joists, nail 1 x 3 furring strips every 12" to 16". If you're using Charter

The Power To Do Your Job!

PROPOSAL

Date : May 28, 2002

To : Ms. Shelia Harrigan
2 Palmetto Drive
Stuart, Florida

Re : Replacement of Feeder

FILE COPY	
TOWN OF SEWALL'S POINT	
THESE PLANS HAVE BEEN	
REVIEWED FOR CODE COMPLIANCE	
Telephone:	4/2/02
DATE:	
FAX:	
BUILDING OFFICIAL	
Gene Simmons	

We propose to furnish and install the following Electrical work :

Remove existing Aluminum Feeder wire and replace them with 3-# 3/0 Copper Feeder wires. Remove the Existing Panel and Panelette which is undersized and contains twin mini circuit breakers. All circuits will remain the same.

TOWN OF SEWALL'S POINT
ONE SOUTH SEWALL'S POINT ROAD
SEWALL'S POINT, FLORIDA 34996

TOWN OF SEWALL'S POINT OWNER/BUILDER AFFIDAVIT
(To be submitted if permit is to be pulled by Owner/Builder)

DISCLOSURE STATEMENT

State law requires construction to be done by licensed contractors. You have applied for a permit under an exemption to that law. The exemption allows you, as the owner of your property, to act as your own contractor even though you do not have a license. You must supervise the construction yourself. You may build or improve a one-family or two-family residence or a farm outbuilding. You may also build or improve a commercial building at a cost of \$25,000 or less. The building must be for your own use and occupancy. It may not be built for sale or lease. If you sell or lease a building you have built yourself within 1 year after the construction is complete, the law will presume that you built it for sale or lease, which is a violation of this exemption. You may not hire an unlicensed person as your contractor. It is your responsibility to make sure that people employed by you have licenses required by State law and by County or Municipal licensing ordinances. Any person working on your building who is not licensed must work under your supervision and must be employed by you, which means that you must deduct F.I.C.A. and withholding tax and provide workers' compensation for that employee, all as prescribed by law. Your construction must comply with all applicable laws, ordinances, building codes and zoning regulations. Florida Statutes 489.103(7).

I have read the above and agree to comply with the provisions as stated.

NOTICE OF ACCEPTANCE (NOA)

PGT Industries
P.O. Box 1529
Nokomis, FL 34274

SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed by Miami-Dade County Product Control Division and accepted by the Board of Rules and Appeals (BORA) to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Division (In Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. BORA reserves the right to revoke this acceptance, if it is determined by Miami-Dade County Product Control Division that this product or material fails to meet the requirements of the applicable building code.

This product is approved as described herein, and has been designed to comply with the High Velocity Hurricane Zone of the Florida Building Code.

DESCRIPTION: Series SGD-2500 Aluminum Sliding Glass Door

APPROVAL DOCUMENT: Drawing No. 741, titled "SGD-2500", sheets 1 through 6 of 6, prepared, signed and sealed by Robert Clark, P.E., dated 2/28/00, bearing the Miami-Dade County Product Control Revision Stamp with the Notice of Acceptance number and expiration date by the Miami-Dade County Product Control Division.

MISSILE IMPACT RATING: None

LABELING: Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement: "Miami-Dade County Product Control Approved", unless otherwise noted herein.

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

TERMINATION of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

ADVERTISEMENT: The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

INSPECTION: A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This NOA revises NOA # 00-0301.03 and, consists of this page 1 as well as approval document mentioned above. The submitted documentation was reviewed by Theodore Berman, P.E.

DISCLOSURE STATEMENT

State law requires construction to be done by licensed contractors. You have applied for a permit under an exemption to that law. The exemption allows you, as the owner of your property, to act as your own contractor even though you do not have a license. You must supervise the construction yourself. You may build or improve a one-family or two-family residence or a farm outbuilding. You may also build or improve a commercial building at a cost of \$25,000 or less. The building must be for your own use and occupancy. It may not be built for sale or lease. If you sell or lease a building you have built yourself within 1 year after the construction is complete, the law will presume that you built it for sale or lease, which is a violation of this exemption. You may not hire an unlicensed person as your contractor. It is your responsibility to make sure that people employed by you have licenses required by State law and by County or Municipal licensing ordinances. Any person working on your building who is not licensed must work under your supervision and must be employed by you, which means that you must deduct F.I.C.A. and withholding tax and provide workers' compensation for that employee, all as prescribed by law. Your construction must comply with all applicable laws, ordinances, building codes and zoning regulations. Florida Statutes 489.103(7).

I have read the above and agree to comply with the provisions as stated.

SEWALL'S POINT, FLORIDA 34996

TOWN OF SEWALL'S POINT OWNER/BUILDER AFFIDAVIT
(To be submitted if permit is to be pulled by Owner/Builder)

DISCLOSURE STATEMENT

State law requires construction to be done by licensed contractors. You have applied for a permit under an exemption to that law. The exemption allows you, as the owner of your property, to act as your own contractor even though you do not have a license. You must supervise the construction yourself. You may build or improve a one-family or two-family residence or a farm outbuilding. You may also build or improve a commercial building at a cost of \$25,000 or less. The building must be for your own use and occupancy. It may not be built for sale or lease. If you sell or lease a building you have built yourself within 1 year after the construction is complete, the law will presume that you built it for sale or lease, which is a violation of this exemption. You may not hire an unlicensed person as your contractor. It is your responsibility to make sure that people employed by you have licenses required by State law and by County or Municipal licensing ordinances. Any person working on your building who is not licensed must work under your supervision and must be employed by you, which means that you must deduct F.I.C.A. and withholding tax and provide workers' compensation for that employee, all as prescribed by law. Your construction must comply with all applicable laws, ordinances, building codes and zoning regulations. Florida Statutes 489.103(7).

I have read the above and agree to comply with the provisions as stated.

TOWN OF SEWALL'S POINT
ONE SOUTH SEWALL'S POINT ROAD
SEWALL'S POINT, FLORIDA 34996

TOWN OF SEWALL'S POINT OWNER/BUILDER AFFIDAVIT
(To be submitted if permit is to be pulled by Owner/Builder)

DISCLOSURE STATEMENT

State law requires construction to be done by licensed contractors. You have applied for a permit under an exemption to that law. The exemption allows you, as the owner of your property, to act as your own contractor even though you do not have a license. You must supervise the construction yourself. You may build or improve a one-family or two-family residence or a farm outbuilding. You may also build or improve a commercial building at a cost of \$25,000 or less. The building must be for your own use and occupancy. It may not be built for sale or lease. If you sell or lease a building you have built yourself within 1 year after the construction is complete, the law will presume that you built it for sale or lease, which is a violation of this exemption. You may not hire an unlicensed person as your contractor. It is your responsibility to make sure that people employed by you have licenses required by State law and by County or Municipal licensing ordinances. Any person working on your building who is not licensed must work under your supervision and must be employed by you, which means that you must deduct F.I.C.A. and withholding tax and provide workers' compensation for that employee, all as prescribed by law. Your construction must comply with all applicable laws, ordinances, building codes and zoning regulations. Florida Statutes 489.103(7).

I have read the above and agree to comply with the provisions as stated.

Sewall's Point, Florida 34996

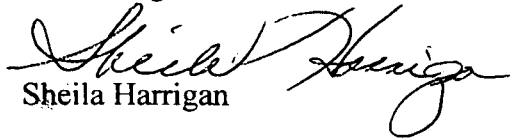

Gene Simmons, Building Official
Town of Sewall's Point
1 Sewall's Point Road
Sewall's Point, Florida 34996

Dear Mr. Simmons,

It has been 6 months since the Roofing Company, Pacific Roofing, pulled their permit to replace the roof for our house. We don't want to jeopardize the interior of the house. Basically, they have abandoned the job, and we will be requesting an Owner's Permit at this time.

I appreciate the consideration of this request.

Warm Regards,

Sheila Harrigan

PERMIT APPLICATION REQUIRED INFORMATION AND SUBMITTALS FOR INTERIOR AND EXTERIOR RENOVATIONS, BREAKFAST NOOK AND POOL DECK EXTENSION LOCATED AT 2 PALMETTO DRIVE

Because of the flood zone issues and the extensive work that is required for all three projects presented under separate applications, I am going to require you to permit all the work under one application and permit. Therefore the following documents are required along with a new application requesting interior and exterior renovations along with replacement of doors and windows.

Submittals (2 copies)

1. Current survey (**within one year**) containing the following information:
 - a. New pool deck location with dimensions to property lines
 - b. New location of bay window with dimensions to property lines
 - c. Computation of pervious and impervious areas
 - d. Certification to the Town Of Sewall's Point
 - e. Signed and sealed by the Surveyor
2. ✓ Product approvals (**current**) from Miami/Dade or other testing institutes approved by the Florida Building Code for the following items:
 - a. Windows (all types)
 - b. Exterior Sliding Glass Doors
 - c. New Front Exterior Door
 - d. Roof System for porch and bay window extension
3. Energy Calculations
4. Wind Load Calculation Sheet
5. Copy of Health Department Permit
6. ✓ Proof of Ownership
7. ✓ Notice of Commencement

The following documents must be signed and sealed by a registered Architect or Engineer. (2 copies)

(A) = ARCHITECTURAL

(S) = STRUCTURAL

1. Floor Plan containing the following information:
 - a. Square footage calculations, a/c and non a/c, porches, entryways, etc. showing existing and new square footage for a/c and non a/c
 - b. Location of all appliances with new kitchen layout
 - c. Dimensions for exterior and interior
 - d. Tempered glass locations
 - e. Window designations (sizes)

f. Door Sizes

2. Elevation Plan containing the following information:

(S)

- a. Front, Rear, and Side Elevations
- b. Building heights from finish floor to top of roof (maximum 27 feet)
- c. Cladding callout or finish callout

3. Foundation Plan containing the following information:

(S)

- a. Bearing walls exterior and interior
- b. Dimensions of all bearing walls exterior and interior
- c. All footings and pad locations
- d. Dimensions of all footing and pads
- e. Step downs
- f. Footing and Pad call outs for size (width and depth), steel (size, lap and placement)
- g. Any underslab mechanical duct work or gas piping
- h. Location of any in slab receptacle locations
- i. Column Layout
- j. Columns Schedule
- k.

4. Electrical Plan containing the following information:

(S)

- a. Show all receptacle, switch, and fixture locations for all new walls, etc.
- b. Show all WPGFI's and GFI's locations
- c. Ceiling fan locations

5. Plumbing Plan containing the following information:

(A)

- a. Piping layout showing all pipe sizes
- b. All fixtures, sanitary drainage, vents, water supply, water heaters
- c. Indicate all slopes
- d.

6. Truss Layout containing the following information:

(S)

- a. Show location of all trusses
- b. Show location of all girders
- c. Uplift quantities for all trusses
- d. Connectors schedule for all trusses and girders
- e. Location of all structural elements size and reinforcing

7. Section/Detail Drawings and Schedules showing the following information:

(S)

- a. Wall section drawings for single and two story sections
- b. Show footings, slab, wall, ceiling and roof construction and insulation
- c. Window and door schedules showing design pressures (+ and -)
- d. Window buck detail showing type, size, length and spacing of connectors to be used

CRITIQUE REVISED

Contractor's Phone Number: 221-8251

Plan Reviewer: Gene Simmons

PERMIT APPLICATION REQUIRED INFORMATION AND SUBMITALS FOR INTERIOR AND EXTERIOR RENOVATIONS, BREAKFAST NOOK AND POOL DECK EXTENSION LOCATED AT 2 PALMETTO DRIVE

Submittals (2 copies)

1. Product approvals (**current**) from Miami/Dade or other testing institutes approved by the Florida Building Code for the following items:
 - a. Fixed glass for family room and bay window
 - b. Exterior sliding glass doors
 - c. Exterior door between garage and house
 - d. New front exterior door
 - e. Metal roof system
 - f. Roof system for flat roof

The following documents must be signed and sealed by a registered Architect or Engineer. (2 copies)

1. Section/Detail Drawings and Schedules showing the following information:
 - a. Section A S1 - Bay window wall section shows extending existing trusses but does not show connectors to wood beam over windows. The length of scabbed on extensions or those connectors or spacing of nails or fasteners need to be called out.
 - b. Section D S1 - Cricket which is to connect existing roof with garage needs to show framing detail with connectors. What type of roof systems will be on the cricket? Need product approval for that roof system.

NOTICE OF ACCEPTANCE (NOA)

Owens Corning
One Owens Corning Parkway
Toledo, OH 43659

SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed by the BCCO and accepted by the Building Code and Product Review Committee to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The BCCO (In Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. BCCO reserves the right to revoke this acceptance, if it is determined by BCCO that this product or material fails to meet the requirements of the applicable building code.

This product is approved as described herein, and has been designed to comply with the South Florida Building Code, 1994 Edition for Miami-Dade County or Florida Building Code.

DESCRIPTION: Onkridge PRO 50 AR

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

TERMINATION of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

ADVERTISEMENT: The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

INSPECTION: A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This NOA consists of pages 1 through 3.

The submitted documentation was reviewed by Frank Zuloaga, RRC

ROOFING SYSTEM APPROVAL

Category: Roofing
Sub-Category: 07310 Asphalt Shingles
Materials: Laminate

1. Scope:

This revises a roofing system using Owens Corning Oakridge PRO 50 AR, Asphalt shingles manufactured by Owens Corning Corporation as described in this Notice of Acceptance, designed to comply with the South Florida Building Code, 1994 Edition for Miami-Dade County.

2. PRODUCT DESCRIPTION

<u>Product</u>	<u>Dimensions</u>	<u>Test Specifications</u>	<u>Product Description</u>
Oakridge PRO 50 AR	13 1/4" x 39 3/8"	PA 110	A heavy weight, fiberglass reinforced four tab asphalt shingle.

3. LIMITATIONS:

- 3.1 Fire classification is not part of this acceptance, refer to current Approved Roofing Materials Directory for fire rating of this product.
- 3.2 Shall not be installed on roof mean heights in excess of 33 ft.

4. INSTALLATION:

- 4.1 Shingles shall be installed in compliance with Miami-Dade County Product Control Shingle Installation Procedure No. 115.
- 4.2 Flashings shall be in accordance with Section 9.3 Optin 'B' (step-flashing) of Miami-Dade County Product Control Shingle Installation Procedure No. 115.
- 4.3 The manufacturer shall provide clearly written application instructions.
- 4.4 Exposure and course layout shall be in compliance with Detail 'A', attached.
- 4.5 Nailing shall be in compliance with Detail 'b', attached.

5. LABELING:

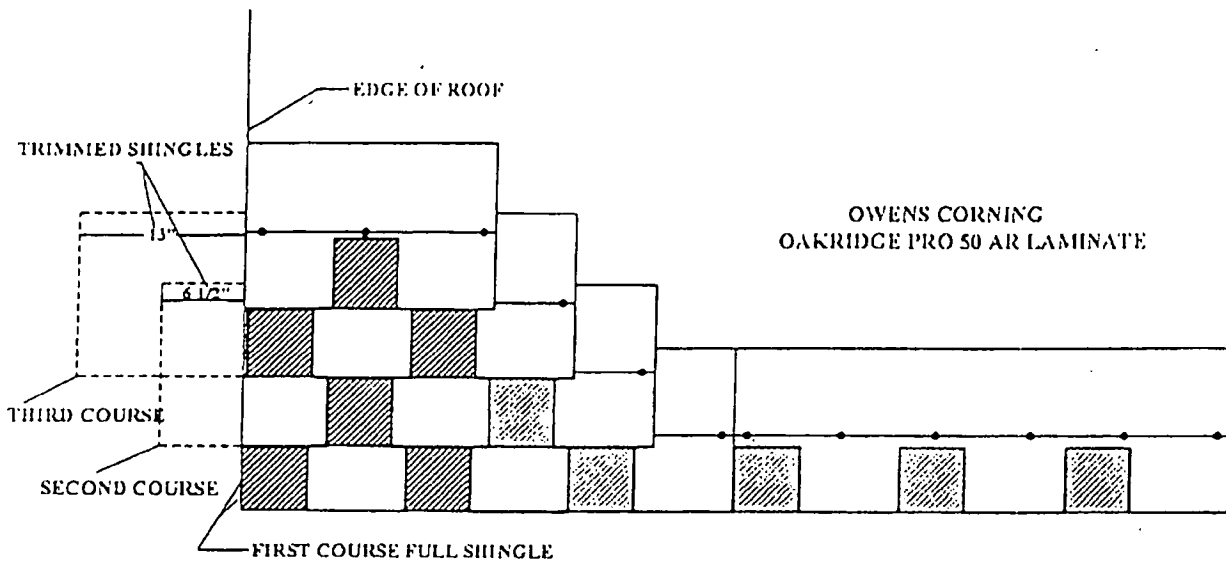

- 5.1 Shingles shall be labeled with the Miami-Dade Logo or the wording "Miami-Dade County Product Control Approval".

6. BUILDING PERMIT REQUIREMENTS:

- 6.1 Application for building permit shall be accompanied by copies of the following:
 - 6.1.1 This Notice of Acceptance
 - 6.1.2 Any other documents required by Building Official or the Applicable Code in order to properly evaluate the installation of this system.

Re: Harrigan Residence
2 Palmetto Rd
Sewall's Point, FL

I am the Engineer of Record for certain modifications to the Harrigan residence. I acknowledge that a specialty Engineer is designing modifications to the roof trusses. This work should not change any of my design work.

I assume no responsibility for changes to the trusses or any impact that these changes have to other parts of the building.

WOLF INTEGRATED COOKTOPS

Model IM15
Multi-function Cooktop

Model IG1S
Grill Cooktop

Model IS1S
Steamer Cooktop

Model IF1S
Fryer Cooktop

With Wolf's integrated cooktops, you have the ultimate in customization. You can create your own design by mixing and matching the various components within this system. And when you couple these modules with some of the other cooktops within the Wolf inventory you and your client will truly understand freedom of choice.

These modules integrate perfectly with their larger counterparts, right down to their low-profile grates, dual stacked gas burners, deep spill pan and illuminated controls. The two-element electric and dual stacked burner gas modules deliver the same performance and appearance as the larger electric and gas cooktops.

The integrated cooktops can be installed together or with 30 or 36-inch cooktops. Where multiple units are installed side-by-side, you add the cut-out dimensions together and 1-1/4-inch additional space for each additional unit, to give you your total cut-out width.

IMPORTANT NOTE: As example, if you install an 30-inch electric cooktop next to a multi-function cooktop, your cut-out size would be 44-1/4 inches (29" + 14" + 1-1/4"). If you install a steamer and fryer next to one another, the total cut-out width is 29-1/4 inches. And if you install a 36-inch gas cooktop next to an electric grill next to a steamer, the total cut-out width is 59-1/2 inches. If you consider installing four modules next to one another, the total cut-out width is 59-3/4 inches (four cooktops at 14" each and three spaces equalling 1-1/4" for the filler strip).

IMPORTANT NOTE: Where multiple units are installed side-by-side, each unit must have its own separate recommended electrical circuit. When multiple gas units are installed next to one another, they can receive their gas supply from a common line. However, each unit **MUST** have its own regulator installed between the mainline and the integrated cooktop.

Cut-out Dimensions

A	Width of single module
B	Depth of module
C	Combined width of two modules plus 1-1/4"
D	Combined width of three modules plus 2-1/2"
E	Combined width of four modules plus 3-3/4"

^A Excluding oven door handle. Add approximately 2 1/4" for door handle.

A. MultiMode® convection selections include Convection Bake, Convection Roast, Convection Broil and Convection Pastry. Convection air is also used with the Drying and Thaw & Serve options. For drying, an optional high-quality mesh drying rack is available as an accessory. Order model #DRYINGRACK.

B. Oven model JJW8627DD has one EasyRack™ oven rack, and one offset rack in each oven. Oven model JJW9627DD has one EasyRack™ oven rack, one offset rack and one Create-A-Space™ half-rack in the upper oven and one EasyRack™ oven rack and one offset rack in the lower oven. Oven model JJW9827DD has one EasyRack™ oven rack, one offset rack and one Create-A-Space™ half-rack in each oven. Oven model JJW8630DD has one EasyRack™ oven rack and one offset rack in each oven. Oven model JJW9630DD has one EasyRack™ oven rack, one standard rack and one Create-A-Space™ half-rack in the upper oven and one EasyRack™ oven rack and one standard rack in the lower oven. Oven model JJW9830DD has one EasyRack™ oven rack, one standard rack and one Create-A-Space™ half-rack in each oven. The EasyRack™ oven rack has an opening at the front of the rack for easily grasping cookware without handles or sides, such as cookie sheets and baking stones. The Create-A-Space™ half-rack is a full-width rack that may be converted to a half-rack.

C. The Automatic Convection Conversion feature takes the guesswork out of convection cooking by automatically converting standard cooking temperature/time to the correct settings for convection cooking.

D. The Favorite Settings option ensures consistent results every time by allowing you to name, program and save the cook time, oven temperature and cooking method for up to 10 of your favorite recipes.

E. The Cook & Hold option keeps food warm for up to one hour after the cook time has expired. The oven automatically turns off after the one hour Hold time has expired.

F. Jenn-Air® wall ovens with convection offer a Bread Proofing feature that provides a controlled environment for proofing or allowing yeast bread products to rise in the oven prior to baking. Two methods are provided - Standard Proofing and Rapid Proofing.

G. The Setup pad on the wall oven control panel lets the user customize several oven functions and features. These include, but are not limited to, Sabbath Mode option, language option of English, French or Spanish, Fahrenheit or Celsius temperature display, and an Energy Saver option that allows the control display to go dark when the oven is not in use.

All Jenn-Air® appliances are appropriately UL, AGA, CSA or CGA approved.

IMPORTANT: Because of continuing product improvements, Jenn-Air reserves the right to change specifications without notice. Dimensional specifications are provided for planning purposes only. For complete details see installation instructions packed with product before selecting cabinetry, making cutouts or beginning installation.

WOLF INTEGRATED COOKTOPS

STEAMER COOKTOP

From a temperature of 140°F to 212°F you can keep food hot for long periods of time or defrost easily without drying out or losing its flavor.

The beauty of the cooktop is accentuated by the sculptured glass lid, which is sure to catch everyone's eye. The domed lid is easily inverted for easy storage when you use one of the optional covers that are available.

The deep, large vessel will enable the homeowner to prepare ample portions of food in little time.

FEATURES

- Large Capacity
- Hidden Element
- Automatic Drain
- Domed Glass Lid
- Three Insert Pans
- Illuminated Controls

Model IS15
15-inch Steamer Cooktop

PLANNING AND DESIGN INFORMATION

The steamer is available in classic stainless steel and does have an optional cover to "hide" this component piece. In addition the glass domed cover is reversible for storage to keep a low profile.

IMPORTANT NOTE: The steamer must be installed with a drain connection. In order to accommodate this, you must provide for a door in the base cabinet where you will have access to the drain connection.

The illustrations below will give you an idea of the overall size that you need to plan for in your installation, plus offer you the finished cut-out dimensions.

IMPORTANT NOTE: Where multiple 15-inch modules are installed side-by-side, add the corresponding unit's cut-out dimension plus 1-1/4 inches. Refer to page 15 for more detail.

Steamer Cooktop Overall Dimensions

ELECTRICAL REQUIREMENTS

The 15-inch Wolf steamer requires a separate, grounded four-wire 240 volt, 15 amp service with its own circuit breaker. The unit is provided with a four-foot flexible four-wire conduit that makes a connection to a junction box.

At 240 volts it is rated at 3.6 Kw.

You must follow all National Electrical Code regulations. In addition, be aware of local codes and ordinances when installing your service.

This cooktop can also accommodate the Wolf downdraft ventilation system. Please refer to page 39 for specifics.

Cut-out dimensions and electrical placement for steamer cooktop.

IMPORTANT: Cutout Dimensions Are Critical. Refer to Installation Instructions packaged with product BEFORE making cutouts.

IMPORTANT: Because of continuing product improvements, Jenn-Air reserves the right to change specifications without notice. Dimensional specifications are provided for planning purposes only. For complete details see installation instructions packed with product before selecting cabinetry, making cutouts or beginning installation.

GRILL COOKTOP

Who says you have to sacrifice the fun of grilling when the weather changes and you cannot take advantage of the outdoors? With this grill cooktop you can easily handle steaks and all sorts of food without the hassle of lava rocks or briquettes.

There are two heating elements – front and back – on this 15-inch unit that enables you to cook on one side of the cooktop while keeping other items at serving temperature.

For ease of cleaning, there are stainless steel plates below the two 1,500 watt heating elements that accumulate any unwanted grease and drain it away.

FEATURES

- Two Heating Elements
- Stainless Steel Collection Plate
- Illuminated Controls
- One Piece Grilling Grid
- Low Profile Grilling Surface

Model IG15
15-inch Grill Cooktop

PLANNING AND DESIGN INFORMATION

The grill cooktop is available in classic stainless steel.

The illustrations below will give you an idea of the overall size that you need to plan for in your installation, plus offer you the finished cut-out dimensions.

This cooktop can also accommodate the Wolf downdraft ventilation system. Please refer to page 39 for specifics.

IMPORTANT NOTE: Where multiple 15-inch modules are installed side-by-side, add the corresponding unit's cut-out dimension plus 1-1/4 inches. Refer to page 15 for more detail.

Grill Cooktop Overall Dimensions

ELECTRICAL REQUIREMENTS

The 15-inch Wolf grill requires a separate, grounded four-wire 240 volt, 15 amp service with its own circuit breaker. The unit is provided with a four-foot flexible four-wire conduit that makes a connection to a junction box.

At 240 volts it is rated at 3.0 Kw.

You must follow all National Electrical Code regulations. In addition, be aware of local codes and ordinances when installing your service.

Cut-out dimensions and electrical placement for grill cooktop.

ELECTRICAL REQUIREMENTS

30" = 40 A
36" = 50 A

IMPORTANT NOTE: It is recommended that the cabinet width be wider than the nominal cooktop width – 33-inch cabinet for the 30-inch cooktop and 39-inch cabinet for the 36-inch cooktop.

IMPORTANT NOTE: If these electric cooktops are to be used with any combination of additional cooktop units or modules with a filler strip, the cut-out increases. For the 15-inch cooktop the cut-out width will be 14 inches, 29 inches for the 30-inch cooktop and 35 inches for the 36-inch cooktop.

IMPORTANT NOTE: Where multiple 15-inch modules are installed side-by-side, or using cooktops next to other cooktops, refer to page 15.

These cooktops can also accommodate the Wolf downdraft ventilation system. Please refer to page 39 for specifics.

The Wolf 15-inch electric cooktop requires a separate, grounded four-wire 240 volt, 15 amp service with its own circuit breaker. The 30-inch cooktop requires a three-wire 240 volt, 40 amp service, while the 36-inch cooktop requires a 240 volt, 50 amp service.

All of the electric cooktops are provided with a four-foot flexible three-wire conduit that can make a connection at a junction box.

At 240 volts the electric cooktops are rated as follows: 15-inch – 3.4 Kw, 30-inch – 6.8 Kw and 36-inch – 9.4 Kw.

At 208 volts the electric cooktops are rated as follows with the minimum amp service noted: 15-inch – 2.6 Kw and 15 amp; 30-inch – 5.2 Kw and 30 amp; 36-inch – 7.1 Kw and 40 amp.

You must follow all National Electrical Code regulations. In addition, be aware of local codes and ordinances when installing your service.

Where an electric cooktop is installed above cabinets, the electrical placement is not critical.

IMPORTANT NOTE: Where an oven is installed below the cooktop, the electrical conduit should run through the adjacent base cabinet within the shaded area shown in the illustrations. The top right-hand area in the oven cavity is available, but will make installation difficult. The bottom cabinet support must be able to support 250 lbs.

Where a 36-inch oven is installed below a cooktop, it is recommended that an additional three inches be added to the cabinet base to ease the use of controls and oven door.

Cut-out dimensions and electrical placement for 15-inch electric cooktop. For installations with no oven or downdraft.

Cut-out dimensions and electrical placement for 30-inch electric cooktop.

Cut-out dimensions and electrical placement for 36-inch electric cooktop.

Dishwasher Cabinet Opening

1. Preferred drain area.
2. Keep back free of drain, water & electrical supply.
3. Minimum 32" drain loop, 1/2" minimum. Floor drains require a siphon break.
4. Electrical and plumbing should meet all local and national codes.
5. Electrical and water supplies should enter cabinet opening on the floor, or through the back or side walls, as shown in the shaded portion of drawing.
6. Connections preferably located toward left side of dishwasher. Care should be taken to route water and electrical away from motor and blower (if equipped).
7. When dishwasher is installed in or near a corner, allow enough room for the door to open without interfering with cabinet drawers or hardware.

IMPORTANT: Cutout Dimensions Are Critical. Refer to Installation instructions packaged with product BEFORE making cutouts.

3-PIECE GRILLE OVERLAY PANEL CONFIGURATION

1-PIECE GRILLE PANEL CONFIGURATION

In some cases, your cabinet manufacturer may choose to work with one panel routed for the different dimensions. Follow these panel dimension and placement instructions to be sure that the custom overlay panels will fit properly.

SIDE-BY-SIDE REFRIGERATOR CUTOUT DIMENSIONS

All dimensions ± 1/8"

*The solid soffit must be within 1" maximum above the refrigerator. If the solid soffit is higher than 1" or one is not available, then the refrigerator must be braced to prevent tipping during use.

**If a recommended water line location is used, no additional plumbing needs to be purchased.

The built-in refrigerator can be installed:

- recessed in the cabinet opening.
 - at the end of cabinets using a side panel to enclose the side of the refrigerator.
- Select one method and use dimensions given. Dimensions shown provide 0" clearance. Installation requires 1/2" clearance to remove top grille and for proper airflow.

OPENING DIMENSIONS

Shown in inches.

	WIDTH† (min.)	HEIGHT (min./max.)	DEPTH (min.)
48-INCH	47 1/2	83 1/4/ 84 3/4	23 1/2

Code Compliance Checklist

Residential Whole Building Performance Method A - Details

ADDRESS: ... 2 PALMETTO DR SEATTLE'S POINT PERMIT #:

6A-21 INFILTRATION REDUCTION COMPLIANCE CHECKLIST

COMPONENTS	SECTION	REQUIREMENTS FOR EACH PRACTICE	CHECK
Exterior Windows & Doors	606.1.ABC.1.1	Maximum: 3 cfm/sq.ft. window area; 5 cfm/sq.ft. door area.	
Exterior & Adjacent Walls	606.1.ABC.1.2.1	Caulk, gasket, weatherstrip or seal between: windows/doors & frames, surrounding wall; foundation & wall sole or sill plate; joints between exterior wall panels at corners; utility penetrations; between wall panels & top/bottom plates; between walls and floor. EXCEPTION: Frame walls where a continuous infiltration barrier is installed that extends from, and is sealed to, the foundation to the top plate.	
Floors	606.1.ABC.1.2.2	Penetrations/openings >1/8" sealed unless backed by truss or joint members. EXCEPTION: Frame floors where a continuous infiltration barrier is installed that is sealed to the perimeter, penetrations and seams.	
Ceilings	606.1.ABC.1.2.3	Between walls & ceilings; penetrations of ceiling plane of top floor, around shafts, chases, soffits, chimneys, cabinets sealed to continuous air barrier; gaps in gyp board & top plate; attic access. EXCEPTION: Frame ceilings where a continuous infiltration barrier is installed that is sealed at the perimeter, at penetrations and seams.	
Recessed Lighting Fixtures	606.1.ABC.1.2.4	Type IC rated with no penetrations, sealed; or Type IC or non-IC rated, installed inside a sealed box with 1/2" clearance & 3" from insulation; or Type IC rated with < 2.0 cfm from conditioned space, tested.	
Multi-story Houses	606.1.ABC.1.2.5	Air barrier on perimeter of floor cavity between floors.	
Additional Infiltration reqts	606.1.ABC.1.3	Exhaust fans vented to outdoors, dampers; combustion space heaters comply with NFPA, have combustion air.	

6A-22 OTHER PRESCRIPTIVE MEASURES (must be met or exceeded by all residences.)

COMPONENTS	SECTION	REQUIREMENTS	CHECK
Water Heaters	612.1	Comply with efficiency requirements in Table 6-12. Switch or clearly marked circuit breaker (electric) or cutoff (gas) must be provided. External or built-in heat trap required.	
Swimming Pools & Spas	612.1	Spas & heated pools must have covers (except solar heated). Non-commercial pools must have a pump timer. Gas spa & pool heaters must have a minimum thermal efficiency of 78%.	
Shower heads	612.1	Water flow must be restricted to no more than 2.5 gallons per minute at 80 PSIG.	
Air Distribution Systems	610.1	All ducts, fittings, mechanical equipment and plenum chambers shall be mechanically attached, sealed, insulated, and installed in accordance with the criteria of Section 610. Ducts in unconditioned attics: R-6 min. insulation.	
HVAC Controls	607.1	Separate readily accessible manual or automatic thermostat for each system.	
Insulation	604.1, 602.1	Ceilings-Min. R-19. Common walls-Frame R-11 or CBS R-3 both sides. Common ceiling & floors R-11.	

No. 30 UL Asphalt Saturated Organic Felt

PRODUCT DATA

DESCRIPTION

No. 30 REGULAR UL SATURATED FELT features a premium quality TAMKO organic felt (non-perforated) that is saturated with asphalt.

USES

Accepted for use as an underlayment felt to be applied over the roof deck prior to the installation to TAMKO asphalt shingles

CERTIFICATION

Underwriters Laboratories Built-Up
Type 30 Label
ASTM D-226, Type II
Underwriters Laboratories Type 30
Label in accordance with U.L. 55A

PRODUCT DATA*

Roll Weight	57 lbs
Roll Dimensions	72' X 36"
Square Feet per Roll	216
Laying Lines	2", 12", & 17"

*All values stated as nominal

**At our Phillipsburg, KS plant there is an additional laying line at 4"

PRODUCT CONTROL NOTICE OF ACCEPTANCE

Woodland Industries, Inc.
1520 Kalamazoo Drive
Griffin, GA 30224

Your application for Notice of Acceptance (NOA) of:
Woodland Industries, Inc. No. 15 & No.30 Asphalt Felt-Plain.
under Chapter 8 of the Code of Miami-Dade County governing the use of Alternate Materials and Types of Construction, and completely described herein, has been recommended for acceptance by the Miami-Dade County Building Code Compliance Office (BCCO) under the conditions specified herein.

This NOA shall not be valid after the expiration date stated below. BCCO reserves the right to secure this product or material at any time from a jobsite or manufacturer's plant for quality control testing. If this product or material fails to perform in the approved manner, BCCO may revoke, modify, or suspend the use of such product or material immediately. BCCO reserves the right to revoke this approval, if it is determined by BCCO that this product or material fails to meet the requirements of the South Florida Building Code.

The expense of such testing will be incurred by the manufacturer.

ACCEPTANCE NO.: 01-0213.08
EXPIRES: 04/12/2006

Raul Rodriguez
Chief Product Control Division

THIS IS THE COVERSHEET, SEE ADDITIONAL PAGES FOR SPECIFIC AND GENERAL CONDITIONS BUILDING CODE & PRODUCT REVIEW COMMITTEE

This application for Product Approval has been reviewed by the BCCO and approved by the Building Code and Product Review Committee to be used in Miami-Dade County, Florida under the conditions set forth above.

Francisco J. Quintana, R.A.
Director
Miami-Dade County
Building Code Compliance Office

APPROVED: 04/12/2001

NOTICE OF ACCEPTANCE STANDARD CONDITIONS

- 1 Renewal of this Acceptance (approval) shall be considered after a renewal application has been filed and the original submitted documentation, including test supporting data, engineering documents, are no older than eight (8) years.
- 2 Any and all approved products shall be permanently labeled with the manufacturer's name, city, state, and the following statement: "Miami-Dade County Product Control Approved", or as specifically stated in the specific conditions of this Acceptance.
- 3 Renewals of Acceptance will not be considered if:
 - a) There has been a change in the South Florida Building Code affecting the evaluation of this product and the product is not in compliance with the code changes;
 - b) The product is no longer the same product (identical) as the one originally approved;
 - c) If the Acceptance holder has not complied with all the requirements of this acceptance, including the correct installation of the product;
 - d) The engineer who originally prepared, signed and sealed the required documentation initially submitted, is no longer practicing the engineering profession.
- 4 Any revision or change in the materials, use, and/or manufacture of the product or process shall automatically be cause for termination of this Acceptance, unless prior written approval has been requested (through the filing of a revision application with appropriate fee) and granted by this office.
- 5 Any of the following shall also be grounds for removal of this Acceptance:
 - a) Unsatisfactory performance of this product or process;
 - b) Misuse of this Acceptance as an endorsement of any product, for sales, advertising or any other purposes.
- 6 The Notice of Acceptance number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the Notice of Acceptance is displayed, then it shall be done in its entirety.
- 7 A copy of this Acceptance as well as approved drawings and other documents, where it applies, shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at all times. The copies need not be resealed by the engineer.
- 8 Failure to comply with any section of this Acceptance shall be cause for termination and removal of Acceptance.
- 9 This Acceptance contains pages 1 through 3.

END OF THIS ACCEPTANCE

Frank Zuloaga, RRC
Roofing Product Control Examiner

ASTM Tile Underlayment

Manufactured in Tuscaloosa, AL

PRODUCT DATA

DESCRIPTION

ASTM TILE UNDERLAYMENT features a tough TAMKO organic felt that is saturated with asphalt then coated on both sides with a weathering grade asphalt and surfaced with opaque granules.

USES

Accepted for use as an underlayment felt to be applied over the deck prior to the installation of concrete tile.

CERTIFICATION

ASTM D-249, Type II

PRODUCT CONTROL NOTICE OF ACCEPTANCE

J.M. Metals
1505 Cox Road
Cocoa FL 32926

Your application for Notice of Acceptance (NOA) of:
JM "SV" Crimp Architectural Metal Roof System
under Chapter 8 of the Code of Miami-Dade County governing the use of Alternate Materials and Types of Construction, and completely described herein, has been recommended for acceptance by the Miami-Dade County Building Code Compliance Office (BCCO) under the conditions specified herein.

This NOA shall not be valid after the expiration date stated below. BCCO reserves the right to secure this product or material at any time from a jobsite or manufacturer's plant for quality control testing. If this product or material fails to perform in the approved manner, BCCO may revoke, modify, or suspend the use of such product or material immediately. BCCO reserves the right to revoke this approval, if it is determined by BCCO that this product or material fails to meet the requirements of the South Florida Building Code.

The expense of such testing will be incurred by the manufacturer.

ACCEPTANCE NO.: 01-0622.07
EXPIRES: 08/16/2006

APPROVED SYSTEMS:

- SYSTEM: SV Steel Roofing Panel
- Deck Type: Wood, Non-insulated
- Deck Description: New Construction or Re-roof
1 9/32" or greater plywood or wood plank.
- Slope Range: 2":12" or greater
- Maximum Uplift Pressure: The maximum allowable design pressure -85 psf
- Deck Attachment: In accordance with applicable building code, but in no case shall it be less than 8d ring shank nails spaced 6" o.c. In reroofing, where the deck is less than 1 7/32" thick (Minimum 1 5/32") The above attachment method must be in addition to existing attachment.
- Underlayment: Minimum underlayment shall be an ASTM D 226 Type II installed with a minimum 4" side-lap and 6" end-laps. Underlayment shall be fastened with corrosion resistant tin-caps and 12 gauge 1 1/2" annular ring-shank nails, spaced 6" o.c. at all laps and two staggered rows 12" o.c. in the field of the roll.
- Valleys: Valley construction shall be in compliance with Roofing Application Standard RAS 133 and with JM Metals SV Steel Roofing Panel' current published installation instructions.
- Fire Barrier Board: For class A or B fire rating, install minimum 1/2" thick Georgia Pacific "Dens Deck" (with current NOA) or minimum 4mm thick of Tritex, RockRoof (with current NOA) or 5/8" water resistant type X gypsum sheathing with treated core and facer.

Metal Panels and Accessories:

Install the "SV Steel Roofing Panel" and accessories in compliance with JM Metals' current published installation instructions and details. Flashing, penetrations, valley construction and other details shall be constructed in compliance with the minimum requirements provided in Roofing Application Standards RAS 133.

SV Roofing Panels shall be fastened with a minimum of #9-15 HH corrosion resistant fasteners with sealing washer. Fasteners shall of sufficient length to penetrate through the sheathing a minimum of 3/16". Fasteners shall be place in accordance with fastener detail herein as follows:

Fasteners shall be installed at a maximum of 12" o.c. at side laps perpendicular to roof slope and at a maximum of 12" o.c. in the center of the panel at the field perpendicular to roof slope. Fastener shall be placed at high points of panel ribs.

NOTICE OF ACCEPTANCE STANDARD CONDITIONS

- 1 Renewal of this Acceptance (approval) shall be considered after a renewal application has been filed and the original submitted documentation, including test supporting data, engineering documents, are no older than eight (8) years.
- 2 Any and all approved products shall be permanently labeled with the manufacturer's name, city, state, and the following statement: "Miami-Dade County Product Control Approved", or as specifically stated in the specific conditions of this Acceptance.
- 3 Renewals of Acceptance will not be considered if:
 - a) There has been a change in the South Florida Building Code affecting the evaluation of this product and the product is not in compliance with the code changes;
 - b) The product is no longer the same product (identical) as the one originally approved;
 - c) If the Acceptance holder has not complied with all the requirements of this acceptance, including the correct installation of the product;
 - d) The engineer who originally prepared, signed and sealed the required documentation initially submitted, is no longer practicing the engineering profession.
- 4 Any revision or change in the materials, use, and/or manufacture of the product or process shall automatically be cause for termination of this Acceptance, unless prior written approval has been requested (through the filing of a revision application with appropriate fee) and granted by this office.
- 5 Any of the following shall also be grounds for removal of this Acceptance:
 - a) Unsatisfactory performance of this product or process;
 - b) Misuse of this Acceptance as an endorsement of any product, for sales, advertising or any other purposes.
- 6 The Notice of Acceptance number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the Notice of Acceptance is displayed, then it shall be done in its entirety.
- 7 A copy of this Acceptance as well as approved drawings and other documents, where it applies, shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at all times. The copies need not be resealed by the engineer.
- 8 Failure to comply with any section of this Acceptance shall be cause for termination and removal of Acceptance.
- 9 This Acceptance contains pages 1 through 5.

SYSTEM LIMITATIONS:

1. Increased design pressures at perimeter and corner areas, in compliance with applicable building code may be met through rational analysis by increasing the number of attachment points in these areas. The maximum fastener spacing noted in the "Systems Description" section of this approval shall not be exceeded. All rational analysis computation shall be prepared, signed and sealed by a Florida registered Professional Engineer, Registered Architect, or Registered Roof Consultant.
2. Panels shall be roll formed in continuous lengths from eave to ridge. Maximum lengths shall be as described in Miami-Dade County Roofing Application Protocol RAS 133.
3. All panels shall be permanently labeled with the manufacturer's name or logo, and the following statement: "Miami-Dade County Product Control Approved."

NOTICE OF ACCEPTANCE (NOA)

PGT Industries
1070 Technology Drive
Nokomis, FL 34275

SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed by Miami-Dade County Product Control Division and accepted by the Board of Rules and Appeals (BORA) to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Division (In Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. BORA reserves the right to revoke this acceptance, if it is determined by Miami-Dade County Product Control Division that this product or material fails to meet the requirements of the applicable building code.

This product is approved as described herein, and has been designed to comply with the Florida Building Code, including the High Velocity Hurricane Zone.

DESCRIPTION: Series "PW-701" Aluminum Picture Window-LMI

APPROVAL DOCUMENT: Drawing No. 4259-4, titled "Aluminum Picture Window, Impact", sheets 1 through 10 of 10, prepared by manufacturer, dated 7/14/03, with revision "A", dated 12/15/03, signed and sealed by Robert L. Clark, P.E., bearing the Miami-Dade County Product Control Approval stamp with the Notice of Acceptance number and approval date by the Miami-Dade County Product Control Division.

MISSILE IMPACT RATING: Large and Small Missile Impact

LABELING: Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement: "Miami-Dade County Product Control Approved", unless otherwise noted herein.

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

TERMINATION of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

ADVERTISEMENT: The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

INSPECTION: A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This NOA consists of this page 1 and evidence pages E-1 and E-2, as well as approval document mentioned above.

The submitted documentation was reviewed by Theodore Berman, P.E.

Handwritten signature and date: Theodore Berman, 12/20/04

NOA No 03-1105.01
Expiration Date: February 19, 2009
Approval Date: February 19, 2004

NOTES:

- TABLE 1 PRESSURES ARE BASED ON THE LARGEST TESTED SIZE RECTANGULAR WINDOW ANCHORED WITH 1/4" TAPCONS. DESIGN PRESSURES ARE LIMITED TO +/-80 P.S.F. WHEN ANCHORING WITH #12 SCREWS.
- ALL MAXIMUM SIZES SHOWN ON SHEET 3 ARE QUALIFIED TO THE PRESSURE OF A 32 SQ. FT. UNIT IN TABLE 1.
- ALL SHAPES LESS THAN THE MAXIMUM SIZE, QUALIFY TO PRESSURE FOR THE MAXIMUM SIZE LISTED IN TABLE 1, OR TO THE PRESSURE FOR THE SMALLEST RECTANGULAR SIZE IN TABLE 1, WHICH THEIR OVERALL WIDTH AND HEIGHT DIMENSIONS COMPLETELY FIT WITHIN.

CRITIQUE REVISED

Owner: Sheila Harrigan

Date: December 14, 2004

Contractor: Owner/Builder

Contractor's Phone Number: 221-8251

Plan Reviewer: Gene Simmons

PERMIT APPLICATION REQUIRED INFORMATION AND SUBMITTALS FOR INTERIOR AND EXTERIOR RENOVATIONS, BREAKFAST NOOK AND POOL DECK EXTENSION LOCATED AT 2 PALMETTO DRIVE

Submittals (2 copies)

1. Product approvals (**current**) from Miami/Dade or other testing institutes approved by the Florida Building Code for the following items:
 - a. Fixed glass for family room and bay window = *SAME AS SIDE LIGHTS ON REAR FR. DOORS*
 - b. Exterior sliding glass doors = *THERE ARE FRENCH DOORS NOT SLIDING*
 - c. Exterior door between garage and house = *STANDARD EXTERIOR GLASS DOORS*
 - d. New front exterior door = *DOOR COVERED BY EXISTING METAL SHUTTERS - SEE NEW PLANS*
 - e. Metal roof system = *SEE AGT PRODUCT SHEETS*
 - f. Roof system for flat roof = *SEE AGT PRODUCT SHEETS*

The following documents must be signed and sealed by a registered Architect or Engineer. (2 copies)

1. Section/Detail Drawings and Schedules showing the following information:
 - a. Section A S1 - Bay window wall section shows extending existing trusses but does not show connectors to wood beam over windows. The length of scabbed on extensions or those connectors or spacing of nails or fasteners need to be called out.
 - b. Section D S1 - Cricket which is to connect existing roof with garage needs to show framing detail with connectors. What type of roof systems will be on the cricket? Need product approval for that roof system.

Sewall's Point, FL 34996

Nominal 1x4 PT wood bucks may be used to shim replacement windows to the existing CMU walls of the above residence providing:

- 1x4 PT bucks are not disapproved by the window manufacturer.
- Window to CMU attachment is as specified by the window manufacturer as part of their windstorm approval.

NOTICE OF ACCEPTANCE (NOA)

**PGT Industries
P.O. Box 1529
Nokomis, FL 34274**

SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed by Miami-Dade County Product Control Division and accepted by the Board of Rules and Appeals (BORA) to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Division (In Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. BORA reserves the right to revoke this acceptance, if it is determined by Miami-Dade County Product Control Division that this product or material fails to meet the requirements of the applicable building code.

This product is approved as described herein, and has been designed to comply with the High Velocity Hurricane Zone of the Florida Building Code.

DESCRIPTION: Series SWD-101 Outswing Aluminum French Door-Impact

APPROVAL DOCUMENT: Drawing No. 971, titled "French Door-X, XX", sheets 1 through 4 of 4, prepared, signed and sealed by Robert L. Clark, P.E., dated 4/13/01, bearing the Miami-Dade County Product Control Revision Stamp with the Notice of Acceptance number and expiration date by the Miami-Dade County Product Control Division.

MISSILE IMPACT RATING: Large and Small Missile Impact

LABELING: Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement: "Miami-Dade County Product Control Approved", unless otherwise noted herein.

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

TERMINATION of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

ADVERTISEMENT: The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

INSPECTION: A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This NOA revises NOA # 01-0417.04 and, consists of this page 1 as well as approval document mentioned above. The submitted documentation was reviewed by Theodore Berman, P.E.

SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed by Miami-Dade County Product Control Division and accepted by the Board of Rules and Appeals (BORA) to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Division (in Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. BORA reserves the right to revoke this acceptance, if it is determined by Miami-Dade County Product Control Division that this product or material fails to meet the requirements of the applicable building code.

This product is approved as described herein, and has been designed to comply with the High Velocity Hurricane Zone of the Florida Building Code.

DESCRIPTION: Series "HS 710" Aluminum Horizontal Sliding Window-Impact Resistant

APPROVAL DOCUMENT: Drawing No.4112, titled "Aluminum Horizontal Sliding Window", sheets 1 through 4 of 4, prepared, signed sealed by Robert L. Clark, P.E., dated 5/22/02 bearing the Miami-Dade County Product Control Revision stamp with the Notice of Acceptance number and expiration date by the Miami-Dade County Product Control Division.

MISSILE IMPACT RATING: Large and Small Missile Impact

LABELING: Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement: "Miami-Dade County Product Control Approved", unless otherwise noted herein.

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

TERMINATION of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

ADVERTISEMENT: The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

INSPECTION: A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This NOA revises NOA # 99-0204.03 and, consists of this page 1 as well as approval document mentioned above. The submitted documentation was reviewed by **Raul Rodriguez**.

Part of the JELD-WEN Family
7312 Convoy Court
San Diego, California 92111

Report No: 03-31287.01
Test Date: 09-13-01
thru: 09-27-01
Report Date: 10-16-01
Expiration Date: 09-27-05

Project Summary: Architectural Testing, Inc. (ATI) was contracted by JELD-WEN Research and Development to perform testing on a series Aurora Composite French door with side lites. Test specimen description and results are reported herein.

Test Specifications: The test specimen was evaluated in accordance with the following:

ASTM E283-91, *"Standard Test Method for Determining the Rate of Air Leakage Through Exterior Windows, curtain Walls, and Doors under Specified Pressure Differences Across the Specimen"*.

ASTM E331-96, *"Standard Test Method for Water Penetration of Exterior Windows, Curtain Walls, and Doors by Uniform Static Air Pressure Difference"*.

ASTM E330-97, *"Standard Test Method for Structural Performance of Exterior Windows, Curtain Walls, and Doors by Uniform Static Air Pressure Difference"*.

Test Specimen Description:

Series/Model: "Aurora"

Type: OXXO Composite French Door with Side Lites

Overall Size: 9' 3-1/2" wide by 8' 1-3/4" high

Side Lite Size: 2 @ 1' 6" wide by 8' 0" high

Active Door Leaf Size: 2' 11-3/4" wide by 8' 0" high

Inactive Door Leaf Size: 3' 0-5/16" (with astragal) wide by 8' 0" high

2524 East Jensen Avenue
Fresno, California 93706
phone: 559.233.8705
fax: 559.233.8360

Anchorage

<u>Description</u>	<u>Quantity</u>	<u>Location</u>
#10 x 2" PFH wood screws	16	Two per hinge into the mullion (inside holes)
#10 x 2-1/2" PFH wood screws	14	6" from the ends of each jamb and 14-1/4" on center into the Laminate Veneer Lumber (LVL) test buck (7 per jamb)
#10 x 2-1/2" PFH wood screws	10	6" from each vertical member and evenly spaced across the sill into the Laminate Veneer Lumber (LVL) test buck
#10 x 2-1/2" PFH wood screws	10	6" from each vertical member and evenly spaced across the head into the Laminate Veneer Lumber (LVL) test buck.
#10 x 2-1/2" PFH wood screws	6	12" from ends of each jamb leg and one on center into side lite (3 per jamb)
#10 x 1-1/4" PFH wood screws	48	6 per hinge (two outside holes at the mullion and four on the door panel).

Glazing: All glass panels were sandwiched glazed using sealed insulating glass, a silicone sealant and decorative molding. The overall insulating glass thickness was 1" consisting of two sheets of 3/16" tempered glass and a super spacer system with a decorative third inner layer consisting of decorative coming and glass.

Weatherstripping:

<u>Description</u>	<u>Quantity</u>	<u>Location</u>
Vinyl wrapped foam compression Weatherstripping	1 Row	Active lock stile, head, sill, and mullion (adjacent to the active panels)

Weatherstripping: (Continued)

<u>Description</u>	<u>Quantity</u>	<u>Location</u>
Vinyl wrapped foam compression weatherstripping	1 Row	The sill (adjacent to side lite)

Frame Construction: The 1-1/4" x 4-9/16" hardwood frame was coped, butted, sealed and attached with two 1-1/2" x 10" Phillip flat head screws per corner. Each 1-3/4" x 4-1/8" x 97-3/4" hardwood mullion posts were attached to the head and sill with (4) #10 by 1-1/2" screws at each end. An aluminum/hardwood sill was employed.

Panel (Door Leaf) Construction: The doors and sidelites were constructed of a composite fiberglass skin 1/8" thick utilizing an internal perimeter frame constructed of 1-1/2" x 7/8" x length hardwood face laminated to 1-1/2" x 2-1/2" x length LVL (Laminated Veneer Lumber) substrate. A 1-1/2" x 2" x 12" lock block is attached to the LVL strike stile on the active and inactive leaves. The fixed leaves (sidelites) were silicone sealed to the frame members. The door core consists of 20 lb. density polyurethane foam core.

Hardware:

<u>Description</u>	<u>Quantity</u>	<u>Location</u>
4-1/2" Butt hinge system	8	4 per door leaf
Three point locking system	1	Active panel lock stile with locks at midspan and each end. The sill strike was shimmed 3/16"
Metal flush bolt	2	One at top and bottom, of the inactive panel lock stile.

Drainage: Sloped sill

Test Results: The results are tabulated as follows:

<u>Title of Test</u>	<u>Results</u>	<u>Allowed</u>
ASTM E283 Air Infiltration @ 1.57 psf (25 mph) @ 6.24 psf (50mph)	0.01 cfm/ft ² 0.05 cfm/ft ²	<0.30 cfm/ft ² max

03-31287.01
Page 4 of 5**Test Results: (Continued)**

<u>Title of Test</u>	<u>Results</u>	<u>Allowed</u>
ATSM E 331 Water Infiltration @ 2.86 psf	No water leakage	No water leakage
ASTM E330 measurements were taken on the mullion (all loads held for 30 seconds)		
Structural Loads positive @Design Pressure (50 psf)	0.510" (deflection)	L/175=0.557"
Structural Loads negative @Design Pressure (50 psf)	0.550" (deflection)	L/175=0.557"
Structural over loads positive @ Test Pressure (75.0 psf)	0.035" (permanent set)	0.4% span =0.390"
Structural over loads negative @ Test Pressure (75.0 psf)	0.030" (permanent set)	0.4% span = 0.390"
ASTM E330 measurements were taken on the active door strike stile (all loads held for 30 seconds)		
Structural Loads positive @Design Pressure (50 psf)	0.845" ^a (deflection)	L/175=0.557"
Structural Loads negative @Design Pressure (50 psf)	1.150" ^a (deflection)	L/175=0.557"
Structural over loads positive @ Test Pressure (75.0 psf)	0.010" (permanent set)	0.4% span =0.390"
Structural over loads negative @ Test Pressure (75.0 psf)	0.010" (permanent set)	0.4% span =0.390"

^a Exceeds L/175, but passes all other test requirements.

Multi-point Door Hardware US CREMONA Door Bolt System

The US CREMONA 3-point locking system features double reinforced shoot bolts, top and bottom, for maximum security and protection against warping of door panels. Also featured is our 90° locking mechanism that incorporates a standard US cylinder offering a variety of keyway systems.

Key Features:

- 3-Point, height adjustable, locking system
- Double reinforced steel shoot bolts top and bottom, deadbolt and latch
- Extensions are available for taller doors
- Lever controlled engaging and releasing of shoot bolts, deadbolt and latch
- Locking by US-Cylinder System with a 90° turn of key or thumbturn
- Non-handed, latch easily reversible
- Heavy duty mortise construction with reinforced lever return spring system
- Available in yellow dichromate, black or white powdercoated finish or stainless steel for increased corrosion resistance and appearance
- Same hardware groove detail throughout our entire door bolt program (router bits available)

Outswing Adjustable Oak Top Sills

- Adjustability up to 1/4" to compensate for uneven door bottoms. Two-part zinc plated steel stud shoulder screw joins a long-barreled, zinc plated steel T-nut for superior stability and long-lasting reliability.
- Vinyl moisture barrier prevents water intrusion. Design of vinyl bulb configuration keeps constant pressure between vinyl and aluminum at any level of adjustment. (Bulb shown compressed.)

Outswing Fixed Bumper Sills, 1" High

- High dam design restricts water intrusion.
- Supplied with high quality G-103 (G) kerfin-seal.
- Available in oak top or aluminum top as shown.

GENERAL NOTES:

1. THESE PRODUCT EVALUATION DOCUMENTS REPRESENT A SHUTTER SYSTEM DESIGNED AND TESTED AS A LARGE MISSILE IMPACT PROTECTIVE SYSTEM IN ACCORDANCE WITH THE FLORIDA BUILDING CODE 2001, WITH 2003 REVISIONS.
2. THIS SHUTTER SYSTEM HAS BEEN TESTED FOR LARGE MISSILE IMPACT RESISTANCE IN CONFORMANCE WITH THE SBCCI STANDARD SSTD 12-99 AND FOR UNIFORM STATIC AIR PRESSURE IN CONFORMANCE WITH ASTM E330. REFERENCED TEST REPORTS CONSTRUCTION TESTING CORPORATION (C.T.C.), TEST REPORT No's. 97-063, 98-009, 98-010, 98-011, 98-014, 99-044, 00-041, 00-022, 01-037 AND 02-012.
3. AN ALLOWABLE STRESS INCREASE HAS NOT BEEN USED IN THE DESIGN OF THIS PRODUCT.
4. DETERMINE THE POSITIVE AND NEGATIVE DESIGN LOADS TO USE WHEN REFERENCING THESE DOCUMENTS IN ACCORDANCE WITH THE GOVERNING CODE AND GOVERNING WIND VELOCITY.
5. THESE PRODUCT EVALUATION DOCUMENTS ARE PREPARED BY THE PRODUCT ENGINEER AND ARE GENERIC. THEY DO NOT INCLUDE INFORMATION PREPARED FOR A SPECIFIC SITE.
6. THESE APPROVAL DOCUMENTS SHALL COMPLY WITH CHAPTER 61G15-23 OF THE FLORIDA ADMINISTRATIVE CODE.
7. THESE PRODUCT EVALUATION DOCUMENTS ARE SUITABLE TO BE APPLIED BY THE CONTRACTOR PROVIDED THE CONTRACTOR DOES NOT DEVIATE FROM THE CONDITIONS DETAILED HEREIN AND THE CONTRACTOR VERIFIES THE EXISTING STRUCTURE IS CAPABLE OF SUPPORTING THE SUPERIMPOSED LOADS.
8. ALTERATIONS OR ADDITIONS TO THIS DOCUMENT ARE NOT PERMITTED.
9. WHEN THE SITE CONDITIONS DEVIATE FROM THESE PRODUCT EVALUATION DOCUMENTS, SITE SPECIFIC DOCUMENTS SHALL BE PREPARED BY A DULY LICENSED AND REGISTERED ENGINEER OR ARCHITECT. SAID DOCUMENTS SHALL BEAR THE DATE, SIGNATURE AND EMBOSSED SEAL OF THE DELEGATED ENGINEER OR ARCHITECT AND SHALL BE SUBMITTED TO THE PRODUCT ENGINEER FOR REVIEW.
10. WHERE COMPLIANCE WITH SSTD 12-99 IS REQUIRED, PANELS SHALL BE PERMANENTLY LABELED WITH A MINIMUM OF ONE LABEL PER OPENING OR THE MANUFACTURER AND INSTALLER SHALL PROVIDE A CERTIFICATE OF COMPLIANCE. WHERE LABELS ARE USED, THE LABEL SHALL READ AS FOLLOWS:
 TOWN & COUNTRY INDUSTRIES, INC.
 FORT LAUDERDALE, FLORIDA
 SSTD 12-99 LARGE MISSILE IMPACT RESISTANT
11. ALL SCREWS, BOLTS AND WASHERS SHALL BE 2024-T4 ALUMINUM ALLOY, STAINLESS STEEL OR GALVANIZED STEEL WITH A MINIMUM TENSILE STRENGTH OF 60 KSI, U.O.N.
12. TOP & BOTTOM DETAILS SHOWN MAY BE INTERCHANGED AS FIELD CONDITIONS DICTATE. PANELS MAY BE MOUNTED HORIZONTALLY IF C-TRACK, BUILD-OUT F-TRACK, 'F' TRACK, 'F' ANGLE, STUD ANGLE OR DIRECT MOUNTED IS USED.
13. STORM PANELS SHALL BE ALUMINUM ALLOY WITH THE FOLLOWING METAL THICKNESS:
 0.040" (3004-H34)
 0.050" (5052-H32)
 0.060" (3004-H34)
14. ALL EXTRUSIONS SHALL BE 6063-T6 ALUMINUM ALLOY, U.O.N.

ANCHOR NOTES:

1. SPANS AND LOADS SHOWN HERE ARE FOR DETERMINING ANCHOR SPACING ONLY. ALLOWABLE STORM PANEL SPANS FOR SPECIFIC LOADS MUST BE LIMITED TO THOSE SHOWN IN TABLE 1.
2. ENTER ANCHOR SCHEDULE BASED ON THE EXISTING STRUCTURE MATERIAL, ANCHOR TYPE AND EDGE DISTANCE. SELECT DESIGN LOAD GREATER THAN OR EQUAL TO NEGATIVE DESIGN LOAD ON SHUTTER AND SELECT SPAN GREATER THAN OR EQUAL TO SHUTTER SPAN.
3. EXISTING STRUCTURE MAY BE CONCRETE, HOLLOW BLOCK OR WOOD FRAMING. REFERENCE ANCHOR SCHEDULE FOR PROPER ANCHOR TYPE BASED ON TYPE OF EXISTING STRUCTURE AND APPROPRIATE CONNECTION TYPE. SEE MOUNTING SECTION DETAILS FOR IDENTIFICATION OF CONNECTION TYPE.
4. ANCHORS SHALL BE INSTALLED IN ACCORDANCE WITH MANUFACTURERS' RECOMMENDATIONS.
5. MINIMUM EMBEDMENT AND EDGE DISTANCE EXCLUDES WALL FINISH OR STUCCO.
6. WHERE EXISTING STRUCTURE IS WOOD FRAMING, WOOD FRAMING CONDITIONS VARY. FIELD VERIFY THAT FASTENERS ARE INTO ADEQUATE WOOD FRAMING MEMBERS, NOT PLYWOOD. FASTENING TO PLYWOOD IS ACCEPTABLE ONLY FOR SIDE CLOSURE PIECES.
7. WHERE LAG SCREWS FASTEN TO NARROW FACE OF STUD FRAMING, FASTENER SHALL BE LOCATED IN CENTER OF NOMINAL 2" x 4" (MIN.) WOOD STUD. 3/4" EDGE DISTANCE IS ACCEPTABLE FOR WOOD FRAMING, WOOD STUD SHALL BE "SOUTHERN PINE" G=0.55 OR GREATER DENSITY. LAG SCREWS SHALL HAVE PHILLIPS PAN HEAD OR HEX HEAD.
8. MACHINE SCREWS SHALL HAVE MINIMUM OF 1/2" ENGAGEMENT OF THREADS IN BASE ANCHOR AND MAY HAVE EITHER A PAN HEAD, TRUSS HEAD, OR WAFER HEAD (SIDEWALK BOLT), U.O.N.
9. DESIGNATES ANCHOR CONDITIONS WHICH ARE NOT ACCEPTABLE USES.
10. * DESIGNATES ANCHORS WHICH ARE REMOVABLE BY REMOVING MACHINE SCREW, NUT OR WASHERED WINGNUT.
11. FOR LOADS GREATER THAN THOSE SPECIFIED (ANCHOR SCHEDULE), SITE SPECIFIC FASTENER ANALYSIS SHALL BE PREPARED BY KNEZEVICH & ASSOCIATES, INC.
12. SEE THE APPROPRIATE SBCCI PST & EST OR NES EVALUATION REPORT ON THE SPECIFIC FASTENER FOR SPECIAL INSPECTION REQUIREMENTS WHEN REQUIRED AS WELL AS FOR INSTALLATION, LIMITATIONS & IDENTIFICATION PURPOSES.
13. FASTENER MAXIMUM SPACING ARE BASED ON FACTOR OF SAFETY OF 4:1 ON TENSION AND SHEAR VALUES WITH THE EXCEPTION OF THE 1/4" WOOD LAG SCREW AND THE 7/16" WOOD BUSHING WHICH ARE BASED ON NDS REQUIREMENTS AND SBCCI TESTING REQUIREMENTS RESPECTIVELY.

TABLES 1 & 3 NOTE:

ENTER TABLE WITH NEGATIVE DESIGN LOAD TO DETERMINE MAX. PANEL SPAN (L_{max}). POSITIVE LOADS LESS THAN OR EQUAL TO THE NEGATIVE LOAD ARE ACCEPTABLE. FOR DESIGN LOADS BETWEEN TABULATED VALUES, USE NEXT HIGHER LOAD OR LINEAR INTERPOLATION MAY BE USED TO DETERMINE ALLOWABLE SPANS.

TABLE 2 NOTE:

THIS SHUTTER SYSTEM IS DESIGNED SUCH THAT THERE IS NO SEPARATION FROM GLASS REQUIRED PROVIDED MINIMUM PANEL LENGTHS AS NOTED. PANEL LENGTHS LESS THAN THOSE NOTED IN TABLE ARE NOT ACCEPTABLE, UNLESS SITE SPECIFIC POROSITY CALCULATIONS ARE PERFORMED BY A PROFESSIONAL ENGINEER.

MR. RICHARD KURTZ
2 PALMETTO DRIVE
STUART, FL 34996

DEAR MR. KURTZ

A CONNECTION WAS MADE FOR A SINK AND A STEAMER BELOW AN EXISTING SLAB, FOR A NEW KITCHEN. THE CONNECTION WAS MADE WITH ALL THE PROPER FITTINGS.

I DO NOT USUALLY WITNESS EVERYTHING THAT MY HELP DOES, BUT IN THIS PARTICULAR CASE, I WAS THERE MYSELF WHEN IT WAS DONE.

I HAVE 35 YEARS IN BUSINESS IN MARTIN COUNTY AND WOULD NOT KNOWINGLY, DO ANYTHING TO JEOPARDIZE MY BUSINESS BY DOING SOMETHING IMPROPERLY.

SINCERELY,

2 PALMETTO DR.

January 8, 2005

Gene Simmons, Building Official
Sewall's Point Building Department
1 Sewall's Point Road
Sewall's Point, Florida 34996

Dear Mr. Simmons:

Ms. Harrigan asked me to inspect the old window bucks being removed and the new P.T. bucks 1X4 - 2X4 's being installed for the PGT Impact doors, windows, fixed glass and sliders. All of the bucks were put in with 3" and 4 " tapcons 8 to 10 inches O.C. staggered and set in a caulking bed. They were then sealed on all sides. All bucks were installed to code and in workmanship manner. Ms. Harrigan greatly appreciates your consideration to permit this private inspection.

Sincerely Yours,

William Honner, Architect

License Number: **2001-07512**

Dear Business Owner:

This is your new occupational license. Please keep the upper portion for your records and detach the bottom of this form. Verify the information and display it conspicuously at your place of business, open to the view of the public.

This license is in addition to and not in lieu of any other license required by law or municipal ordinance and is subject to regulations of zoning, health, and any other lawful authority (County Ordinance Number 72-7).

Licenses may be transferred to a new owner when evidence of a sale is provided; the original license is surrendered and a transfer fee is paid.

Licenses may be transferred to a new location when proof of zoning approval is provided; the original license is surrendered and a transfer fee is paid.

Business name changes require a new license.

This license **expires on September 30, 2005**. Renewal notices are mailed at the end of July. If you do not receive the notice by the middle of August, please let us know.

I hope you have a successful year.

Design wind speed up to 150 mph with wind load of 32 psf.

SMB and 7" Super Gutter Composite Beam	1/2 Screen Roof Beam Span									
	6	8	10	12	14	16	18	20	22	24
7" super gutter alone	Max. span of 6 ft. of only screen and purlins attached to gutter between supports.									
2" x 6" x 0.050 x 0.120	13.0	12.3	11.7	11.2	10.8	10.4	10.0	9.7	9.4	9.2
2" x 7" x 0.055 x 0.120	13.9	13.2	12.6	12.1	11.6	11.2	10.8	10.4	10.1	9.8
2" x 8" x 0.072 x 0.224	16.8	16.0	15.2	14.6	14.0	13.5	13.0	12.6	12.3	11.9
2" x 9" x 0.082 x 0.306	18.0	17.1	16.3	15.6	15.0	14.4	13.9	13.5	13.1	12.7
2" x 10" x 0.092 x 0.389	19.5	18.5	17.7	16.9	16.2	15.7	15.1	14.6	14.2	13.8
2" x 10" x 0.092 x 0.389	22.8	21.7	20.6	19.8	19.0	18.3	17.7	17.1	16.6	16.1

- Notes:
- Solid roof span of 12 feet is used for maximum span calculations. If solid roof span is greater than 12 feet, for every foot greater than 12 feet, use 1/4 screen roof beam span plus 2 feet values.
 - Screen roof wind loads are 16 psf. Solid roof wind loads are shown above each table.
 - Solid roof portions may be replaced with screen roof portions in part or whole.

Table 2.8 Maximum Spans for Screen Wall Girts or K-Bracing (feet), Exposure B

Design wind speed up to 130 mph with wind load of 25.6 psf.
Maximum spacing of girts = 7 feet o.c.

2" x 2" x 0.04"	8.10 feet
2" x 3" x 0.045"	10.28 feet
2" x 4" x 0.050"	12.84 feet
2" x 5" x 0.062"	17.38 feet

Design wind speed up to 150 mph with wind load of 33.6 psf.
Maximum spacing of girts = 7 feet o.c.

2" x 2" x 0.04"	7.00 feet
2" x 3" x 0.045"	8.97 feet
2" x 4" x 0.050"	11.20 feet
2" x 5" x 0.062"	15.17 feet

Design wind speed up to 130 mph with wind load of 25.6 psf.
Maximum vertical spacing of girts = 10 feet o.c.

2" x 2" x 0.04"	6.60 feet
2" x 3" x 0.045"	8.60 feet
2" x 4" x 0.050"	10.74 feet
2" x 5" x 0.062"	14.54 feet

Design wind speed up to 150 mph with wind load of 33.6 psf.
Maximum vertical spacing of girts = 10 feet o.c.

2" x 2" x 0.04"	5.76 feet
2" x 3" x 0.045"	7.51 feet
2" x 4" x 0.050"	9.37 feet
2" x 5" x 0.062"	12.69 feet

- Note:
- Tables based on FRC Table 2002.4 Load Case A L/W=2 (worst case)
Maximum girt spans are indirectly limited to 9 feet since maximum beam-to-beam span tables end at 9 feet o.c.

Table 2.17 Connection Detail # for Column to Foundation and Roof Beam to Host Structure Wall (Combined Stresses from Uplift and Lateral Loads)
