STUBOUT ELEVATION AND EXCAVATION CERTIFICATION

APPLICANT: Thomas Lucido SEPTIC TANK PERMIT NO.: HD 43-55-307

LEGAL DESCRIPTION: Lot 4 Ridgeland

The items which are checked off below must be certified by a surveyor or engineer and returned to the Martin County Health Department prior to the first plumbing inspection by the Building Department. Approval of this stubout elevation certification constitutes commencement of building construction for septic system permits.

X 1. Building Permit Number: _____ (Certification not required for this item).

___2. I certify that the elevation of the top of the lowest plumbing stubout is _____ inches (circle one) above / below benchmark elevation as indicated on septic tank permit.

X 3. I certify that the top of the lowest building plumbing stubout is _____ inches (circle one) above/ below crown of road elevation shown on septic tank permit.

___4. I certify that the top of the drainfield pipe elevation is _____.

___5. I certify that all moderate or severely limited soils have been removed from an area of _____ feet by _____ feet a minimum depth of _____. Surveyor must submit 2 plot plans to scale of excavated area. (See diagram ___A/ ___B on reverse side) Date Observed: __/__/__

___6. I certify that all moderately and severely limited soils have been removed in an area _____ feet wide or 33% of the area of the drainfield. This area is centered in the drainfield and extends to a depth of _____ feet where slightly limited soils exist. Surveyor must submit 2 plot plans to scale of excavated area. (See diagram B on reverse side) Date Observed: __/__/__

___7. I certify that all severely limited soils have been removed from an area one foot beyond the perimeter of the drainfield rock and the excavation meets all detail requirements as shown in _____ "Diagram A", or _____ "Diagram B" on reverse side. Surveyor must submit 2 plot plans to scale of excavated area. Date Observed: __/__/__

NOTE: a. Severely limited soil includes but is not limited to hardpan, clay, silt, marl or muck.
b. Drainfield must be centered in the excavated area. Drainfield will not be approved if severe limited soils are not removed.
c. Condition numbers 5, 6 and 7 may be satisfied with excavation certification from the certified septic installer responsible for drainfield installation.

CERTIFIED BY: _____

As applicant or applicant's representative, I understand the above requirements.

SEPTIC TANK SYSTEM SPECIAL CONDITIONS LIST

APPLICATION NAME: Thomas Lucido **PERMIT NO. :** 43-SS-307

SUBDIVISION: _____

N O T E Special Condition(s) marked "X" are in effect.

X 1. Drainfield must be maintained under grass; ___and protected from vehicular traffic (i.e., traffic barriers).

___2. Operational test of dosing pump(s) and high water alarm (audible and visual) required prior to final construction approval.

X 3. Driveway / sidewalk elevation must be 9" higher than drainfield pipe elevation if they are within 5 feet of each-other.

X 4. Septic system must be 75' from surface water / wetlands /mean high water line.

___5. Excavate one foot beyond drainfield area to a depth of _____.

___6. In addition to item #5, 33% of unsuitable soils at depths greater than _____ _____ must be removed to a depth of slightly limited soils.

___7. If excavation is not required below the drainfield, the organic vegetation layer at the existing grade must be removed and slightly limited fill placed between the existing grade and the bottom of the drainfield.

___8. Septic tank abandonment notices from the Septic Tank Contractor must be received by this office prior to final construction approval.

___9. The attached well abandonment form must be completed by a certified well driller and and submitted to this office prior to the initial building construction or system inspection

___10. The mound area must be sodded prior to the request for final grade inspection.

X 11. Any future ponds or surface water created onsite must be greater than 75' from septic system(s).

X 12. The available area for septic installation must to be evenly filled and leveled.

___13. $____ re-inspection fee is required if the well is not installed at time of initial onsite sewage disposal system inspection.

X SEE REVERSE SIDE FOR ADDITIONAL REQUIREMENTS. Page 1 of 3

X 14. Septic system must be a minimum of 10 feet from drainage culverts or storm water drains and a 15 feet minimum from dry retention, dry detention or dry drainage ditches.

___15. Occupational approval will not be given until all requirements for public water system/ food-service/ institutional/ septic system are met. _____

___16. Septic tank/ dosing chamber/ grease trap must have (traffic lids with) ___ manhole cover (s) per tank extending to the surface.

___17. _____ to be dosed two / six times in a twenty-four hour period is required. A high water alarm that gives audible and visual signals is required. If two drainfields are used, each field must be connected to an individual pump and alternately dose.

___18. Two pumps are required to alternately dose into two separate fields. Separate drainfields must be a minimum of 10 feet apart.

X 19. If rainwater from the building roof drains onto the drainfield available area, gutters are required in the area of drainfield. Down-spouts must be diverted from the drainfield area.

X 20. Irrigation lines must be separated from the drainfield by ten feet unless an approved backflow prevention device is properly installed.

X 21. Potable water lines, whether connected to an on-site well or to a utility meter, must be a minimum of ten feet from drainfields or sealed with a water proof sealant within a sleeve of similar pipe to a distance of ten feet from the nearest portion of the drainfield. In no case can the sleeved line be located within 24 inches of the drainfield or at an elevation lower than the bottom of the drainfield.

X 22. All wells installed onsite must be 25' from the building foundation and meet all other setback installation requirements.

X 23. Applicant is responsible for replacing excavated soils with a good grade of soil suitable for drainfield installation.

X 24. If the building stubout is placed more than 20ft. from septic tank or drainfield, the stubout elevation must be higher than the permitted elevation to achieve gravity flow. This must have prior approval from the health unit.

X 25. If fill is required, contact Martin County Building Division for requirements.

X 26. Inspection results will be posted on the building permit. A copy of the construction approval is available upon request.

X 27. A septic tank outlet filter is required on all septic tanks.

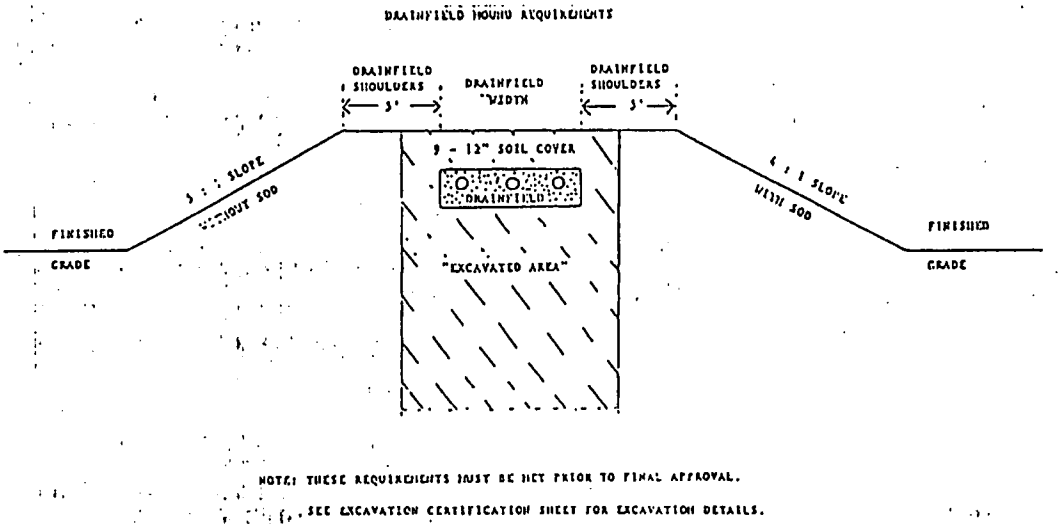
X 28. If any information on this permit changes, an amended application is required to be filed immediately.

X 28. Any alteration of the information or conditions of this permit found to be in non compliance with 64E-6, Florida Administrative Code, will be sufficient cause for revocation of this permit.

___29. The engineer of record must certify that the installed system complies with the approved design and installation requirements.

___30. Prior to final construction approval, the property owner must apply for an annual operating permit and pay the $_____ annual permit fee (For ___Indust./Manuf. ___Aerobic system(s).

___31. If a mound drainfield is proposed, see following sketch of additional requirements (No retaining walls are allowed within the drainfield shoulder or slope areas of a mound system).



NOTE: THESE REQUIREMENTS MUST BE MET PRIOR TO FINAL APPROVAL.

SEE EXCAVATION CERTIFICATION SHEET FOR EXCAVATION DETAILS.

___32. Other:_____

_____

_____

PROPOSED SEPTIC SYSTEM SITE INFORMATION

CIRCLE ONE ANSWER FOR EACH QUESTION (FOR ITEMS 1 -17 BELOW).
N/A MEANS THAT THE QUESTION IS NOT APPLICABLE

1. Is there a septic system within 75 feet of the proposed private well? — Yes No (N/A)
2. Is there a potable private well within 75 feet of the available area for the proposed septic system? — Yes (No)
3. Is there a non-potable well within 50 feet of the available area for the proposed septic system? — Yes (No)
4. Is there a proposed well within 25 feet of the building foundation? — Yes (No)
5. Is there a public well that serves less than 25 people or less than 15 homes or businesses within 100 feet of the proposed septic system? — Yes (No)
6. Is there a public well that serves more than 25 people or more than 15 homes or businesses within 200 feet of the proposed septic system? — Yes (No)
7. Is there a gravity sewer line or lift station within 50 feet of the proposed lot? — Yes (No)
8. Is there a lake, stream, wetland, or surface water within 75 feet of the available area for the proposed septic system? — Yes (No)
9. Is there a proposed or existing public drinking water line within 10 feet of the proposed septic system? — Yes (No)
10. Is there a storm water retention area or drainage easement within 15 feet of the proposed septic system? — Yes (No)
11. Is the proposed septic system in an area proposed for paving or vehicular traffic? — Yes (No)
12. Are all private wells, septic systems and surface water on adjacent or contiguous land within 75 feet of the applicant's lot shown on the site plan? — (Yes) No N/A
13. Are all public wells within 200 feet of the applicant's lot shown on the site plan? — Yes No (N/A)
14. Does the site plan include a plat of the lot or total site ownership drawn to scale, boundaries with dimensions, locations of building or residences, swimming pools, recorded easements, proposed or existing septic systems, any proposed or existing wells, public water lines, paved areas or driveways, and surface waters such as lakes, ponds, streams, canals, or wetlands? — (Yes) No
15. Does the site plan show the general slope of the property, recorded easements from the recorded plat, filled areas and drainage features and surface waters such as lakes, ponds, streams, canals, or wetlands? — (Yes) No
16. Are the natural grade elevation in the area of the septic system and the benchmark shown on the site plan? — (Yes) No
17. Is the public water line location from the water meter to the house shown on the site plan? — (Yes) No N/A
18. There is 1200 square feet of available, unobstructed, contiguous land to install the septic system. This area excludes interferences. Shade this available area on the site plan.

SITE ELEVATIONS

1. Crown of road elevation 7.02 NGVD. Show location on the site plan. If the road is not paved, benchmark elevation 7.02 NGVD. Show location on site plan.
2. Natural grade elevation in the area of the proposed septic system 7.0 NGVD. Show location on site plan.
3. Is the building location in a flood hazard area "A" or "V" as identified on F.E.M.A. maps? (Yes) or No If yes, what is the minimum required flood hazard floor elevation of the building? 8.0 NGVD.

NOTE: Please locate the reference point or benchmark within 200 feet of the proposed septic system.

NOTE: MUST BE CERTIFIED BY A FLORIDA REGISTERED SURVEYOR OR ENGINEER.

Via Facsimile No. 220-4765

Re: Town of Sewall's Point; New Ordinances

Dear Ed:

This letter is a follow-up to our telephone conversation this week regarding the ordinances the Town Commission directed me to draft at the November, 1999 meeting. The Town Commission has instructed me to draft an ordinance permitting walls, fences and other enclosures up to seven feet (7') high in the set backs behind the front line of the building and up to five feet (5') in front of the front line of the building. The Town Commission also instructed me to draft an ordinance permitting building permits to be extended for up to six (6) months for a payment of ten percent (10%) of the original building permit fee, per month.

It is my opinion you may begin issuing Certificates of Occupancy and extending building permits in accordance with these new proposed ordinances, provided that the Certificate of Occupancy and building permit extension are conditioned on passage of the new ordinances.

Please call me if you need anything further.

Sincerely yours,

Tim B. Wright

TBW/mcf

OWNER'S AFFIDAVIT OF BUILDING COSTS

STATE OF FLORIDA
COUNTY OF MARTIN

BEFORE ME, the undersigned notary public, personally appeared the undersigned Affiant, who, being first duly sworn, under penalties of perjury, deposes and says:

1. That Affiant is the owner or the authorized agent of the owner of certain real estate (the Property) located within the municipal limits of the Town of Sewall's Point, Florida (the Town), having the street address set forth below Affiant's signature.

2. That all of the improvements on the Property under current building permit(s) issued by the Town have been completed in substantial conformity with the plans and specifications on file with the Town and in accordance with all applicable state and local building codes.

3. That the total cost paid or to be paid by the owner for the complete construction of the improvements under the building permit(s), including the cost of all improvements shown on the plans and specifications filed with the Town and all machinery and equipment not shown thereon required to be installed as a condition for a certificate of occupancy under state and local law, is $ ~~362,000~~ # 343,000 (less separate permits. (pool & wall.)
11/24/99.

4. That this affidavit is made for the purpose of inducing the building official of the Town to issue a certificate of occupancy for the improvements, with the intention that it be relied upon for that purpose.

Affiant

TOWN OF SEWALL'S POINT

MEMORANDUM

To: Cyrus Kissling, Building Commissioner
Timothy Wright, Town Attorney

FROM: Edwin B. Arnold, Building Official

Cc: Thomas Lucido, Owner/Builder

Date: November 26, 1999

RE: [redacted]
Permit Number 4750

The original building permit for the referenced single family residence (BP 4503) expired on November 16, 1999. Construction is substantially complete and a request for a final inspection has been received. I understand that in lieu of mandatory annual renewals, monthly permit renewals (up to six months) will be allowed under proposed ordinance revisions pending before the Town Commission.

In accordance Mr. Wright's opinion letter of November 24, 1999, I have renewed the Building Permit for a period of one (1) month from the date of expiration, upon payment by the owner/builder of a renewal fee of ten (10) per cent of the original construction (Building, A/C, Electrical, and Plumbing) permit fees, conditioned upon passage of the new ordinance within ninety (90) days.

Date: November 26, 1999

Re: [redacted]
Permit Number 4750

The final survey submitted on the referenced project indicates an apparent (undimensioned) encroachment of the pool deck into the side and rear set back areas of the property. Having only received the survey the prior afternoon, I pointed this out to Mr. Lucido at our meeting last Wednesday when the permit was renewed, and he indicated that he had obtained an opinion (this would certainly have been prior to my appointment) that this was permissible - apparently under a theory that brick pavers bedded in sand were not "permanent". I deferred further comment pending the site inspection scheduled for that date and review of the file and applicable ordinances. The results of my inspection, review, research and analysis are as follows:

1. The original permit was issued for the building only; the courtyard, pool and deck were neither reviewed or permitted at that time.
2. Upon application, a separate fee permit was issued by me for construction of a courtyard area with surrounding walls. A final inspection of this construction was performed at the time of the C.O. inspection on Wednesday, and it is in compliance with permit documents and set back requirements.
3. Upon application, a separate fee permit was issued by me for construction of a pool located in the southeast portion of the site. The pool was located within the set backs as required; the pool contractor specifically excluded the deck from his application and I noted that a separate permit would be required. It should be noted that the pool was sited sufficiently within the setbacks to allow a perimeter deck.

One South Sewall's Point Road, Sewall's Point, Florida 34996
Town Hall (561) 287-2455 • Fax (561) 220-4765 • E-Mail: clerk@sewallspoint.org
Police Department (561) 781-3378 • Fax (561) 286-7669 • E-Mail: police@sewallspoint.org

4. The pool permit is still open; a final inspection has not been requested by the pool contractor.
5. Although the pool deck has been completed, with the encroachments previously noted, no application for the required pool deck permit has been submitted.

Our Zoning Ordinance (Appendix B, Section XI, E.1) specifically provides that:

"swimming pools, poolside aprons, and terraces ... shall be subject to building set back line regulations."

This is consistent with, and reinforced by, the definition of a structure as:

"(a)nything constructed or erected, the use of which requires permanent location on the land ... (A)ny open patio ... or an apron adjacent to a swimming pool shall be considered a structure for the purpose of this Ordinance and for the purpose of determining setback lines."

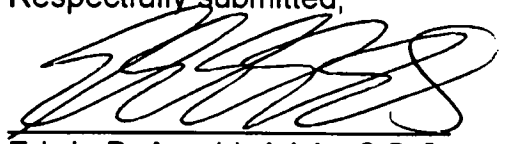
It is permanence rather than materials of construction which determines when structures must comply with set back requirements. Here, the pool deck is clearly intended to be permanent, a determination reflected in my requirement that a permit be issued for construction. Supporting this position, we find temporary structures defined as:

"(a)nything constructed or erected, the design of which or intended use of which, is other than long term, indefinite life design or use."

Addressing Mr. Lucido's assertion of prior verbal authorization, I can only note that the Ordinance is clear on its face and my position on this issue has been consistent. Further, at no time did any submittal indicate an intent to act upon any interpretation of the set back requirements other than in full compliance, and the work was completed without obtaining the required permit.

Field inspection of the pool deck as installed shows it to be of substantial construction, clearly intended to be "permanent" within the sense of both the Ordinances and ordinary usage. As such, it is my position as Building Official that it must be permitted (as previously requested) and included within the total scope of construction work; all set back requirements must be complied with prior to final inspection. This is a zoning issue; should a contrary position be taken, I shall of course defer to the Commission and legal opinion of counsel.

Respectfully submitted,



Edwin B. Arnold, A.I.A., C.B.O.

ELEVATION CERTIFICATE

O.M.B. No 3067-0077
Expires May 31, 1993

Job# 805-32-01

FEDERAL EMERGENCY MANAGEMENT AGENCY
NATIONAL FLOOD INSURANCE PROGRAM

ATTENTION: Use of this certificate does not provide a waiver of the flood insurance purchase requirement. This form is used only to provide elevation information necessary to ensure compliance with applicable community floodplain management ordinances, to determine the proper insurance premium rate, and/or to support a request for a Letter of Map Amendment or Revision (LOMA or LOMR).
Instructions for completing this form can be found on the following pages.

SECTION A PROPERTY INFORMATION

	FOR INSURANCE COMPANY USE
BUILDING OWNER'S NAME: TOM LUCIDO	POLICY NUMBER
STREET ADDRESS (Including Apt., Unit, Suite and/or Bldg. Number) OR P.O. ROUTE AND BOX NUMBER: 2 SABLE COURT	COMPANY NAIC NUMBER
OTHER DESCRIPTION (Lot and Block Numbers, etc.): LOT 4, RIDGELAND	
CITY: SEWALL'S POINT — STATE: FLA. — ZIP CODE:	

SECTION B FLOOD INSURANCE RATE MAP (FIRM) INFORMATION

Provide the following from the proper FIRM (See Instructions):

1. COMMUNITY NUMBER	2. PANEL NUMBER	3. SUFFIX	4. DATE OF FIRM INDEX	5. FIRM ZONE	6. BASE FLOOD ELEVATION (in AO Zones, use depth)
120164	0002	D	6/16/92	A-10	8.00

7. Indicate the elevation datum system used on the FIRM for Base Flood Elevations (BFE): ☒ NGVD '29 ☐ Other (describe on back)
8. For Zones A or V, where no BFE is provided on the FIRM, and the community has established a BFE for this building site, indicate the community's BFE: ☐☐☐☐☐.☐ feet NGVD (or other FIRM datum–see Section B, Item 7).

SECTION C BUILDING ELEVATION INFORMATION

1. Using the Elevation Certificate Instructions, indicate the diagram number from the diagrams found on Pages 5 and 6 that best describes the subject building's reference level 1.
2(a). FIRM Zones A1-A30, AE, AH, and A (with BFE). The top of the reference level floor from the selected diagram is at an elevation of ☐☐☐9.5 feet NGVD (or other FIRM datum–see Section B, Item 7).
(b). FIRM Zones V1-V30, VE, and V (with BFE). The bottom of the lowest horizontal structural member of the reference level from the selected diagram, is at an elevation of ☐☐☐☐☐.☐ feet NGVD (or other FIRM datum–see Section B, Item 7).
(c). FIRM Zone A (without BFE). The floor used as the reference level from the selected diagram is ☐☐.☐ feet above ☐ or below ☐ (check one) the highest grade adjacent to the building.
(d). FIRM Zone AO. The floor used as the reference level from the selected diagram is ☐☐.☐ feet above ☐ or below ☐ (check one) the highest grade adjacent to the building. If no flood depth number is available, is the building's lowest floor (reference level) elevated in accordance with the community's floodplain management ordinance? ☐ Yes ☐ No ☐ Unknown
3. Indicate the elevation datum system used in determining the above reference level elevations: ☐ NGVD '29 ☐ Other (describe under Comments on Page 2). *(NOTE: If the elevation datum used in measuring the elevations is different than that used on the FIRM [see Section B, Item 7], then convert the elevations to the datum system used on the FIRM and show the conversion equation under Comments on Page 2.)*
4. Elevation reference mark used appears on FIRM: ☐ Yes ☐ No (See Instructions on Page 4)
5. The reference level elevation is based on: ☒ actual construction ☐ construction drawings
(NOTE: Use of construction drawings is only valid if the building does not yet have the reference level floor in place, in which case this certificate will only be valid for the building during the course of construction. A post-construction Elevation Certificate will be required once construction is complete.)
6. The elevation of the lowest grade immediately adjacent to the building is: ☐☐☐9.0 feet NGVD (or other FIRM datum-see Section B, Item 7).

SECTION D COMMUNITY INFORMATION

1. If the community official responsible for verifying building elevations specifies that the reference level indicated in Section C, Item 1 is not the "lowest floor" as defined in the community's floodplain management ordinance, the elevation of the building's "lowest floor" as defined by the ordinance is: ☐☐☐☐☐.☐ feet NGVD (or other FIRM datum–see Section B, Item 7).
2. Date of the start of construction or substantial improvement _____

SECTION E CERTIFICATION

This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify elevation information when the elevation information for Zones A1–A30, AE, AH, A (with BFE), V1–V30, VE, and V (with BFE) is required. Community officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFE), a building official, a property owner, or an owner's representative may also sign the certification.

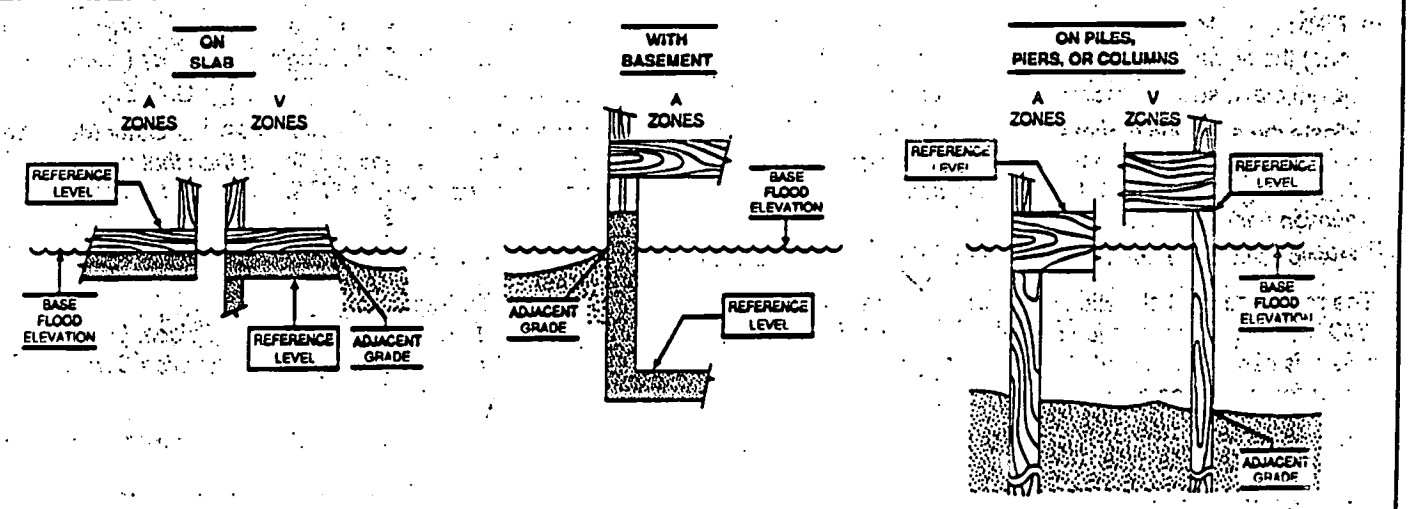
Reference level diagrams 6, 7 and 8 - Distinguishing Features–If the certifier is unable to certify to breakaway/non-breakaway wall, enclosure size, location of servicing equipment, area use, wall openings, or unfinished area Feature(s), then list the Feature(s) not included in the certification under Comments below. The diagram number, Section C, Item 1, must still be entered.

I certify that the information in Sections B and C on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.

Stephen J. Brown		4049	
CERTIFIER'S NAME		LICENSE NUMBER (or Affix Seal)	
Land Surveyor		Stephen J. Brown, Inc.	
TITLE		COMPANY NAME	
619 East 5th Street	Stuart	Florida	34994
ADDRESS	CITY	STATE	ZIP
SIGNATURE	7/1/99 DATE	(561) 288-7176 PHONE	

Copies should be made of this Certificate for: 1) community official, 2) insurance agent/company, and 3) building owner.

COMMENTS:



The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones.

Elevations for all A Zones should be measured at the top of the reference level floor.

Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.

March 6, 1999

Engineering Change Order Number 1

TO: Town of Sewall's Point Building Department

REF: Lucido Residence, Lot 4, Ridgeland Sub-Division

SUBJECT: Building size reduced to cure survey error.

CHANGE ORDER:

The attached drawings show that the structure has been reduced in size specifically at the front porch and second floor bedroom No. 2 by 16" to place the building within the proper building set-back area. This change requires the removal of the existing 12" CMU stem-wall along the front of the front porch and the construction of a 12" wide by 32" high reinforced grade beam. (See structural details) The non-bearing interior walls relative to bedrooms 2 and 3 have been modified along with the associated closets to distribute the reduction in size between the two bedrooms. This change order does not change any vertical dimensions. This change reduces the second floor air-conditioned square footage by 24 square feet, and the first floor front porch exterior square footage by 24 square feet. The first floor air-conditioned square footage has not changed.

NOTE: The new grade beam and concrete slab should not be poured until the surveyor certifies the forming of the grade beam and all other parts of the slab are within the building set-back area.

Respectfully submitted by Paul A. Wingler, P.E.

March 6, 1999

Engineering Change Order Number 2

TO: Town of Sewall's Point Building Department

REF: Lucido Residence, Lot 4, Ridgeland Sub-Division

SUBJECT: PVC sanitary drain pipes for bedroom #3 bath embedded in 8" CMU wall.

CHANGE ORDER:

Replace 9 lineal feet of CMU Bond beam with 8"x16" cast-in-place concrete tie beam with 4 #5 steel reinforcing bars to accommodate 2 PVC sanitary drain pipes, (a 3" Dia. and a 2" Dia. Pipe) passing through the tie beam. See drawing sheet No. 4 for specific location. Please note that Header Number H-15 will not be a Cast-Crete header and is replaced be this cast-in-place tie beam.

Respectfully submitted by Paul A. Wingler, P.E.

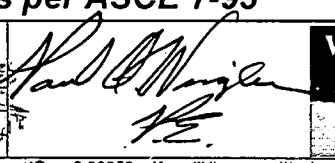
Wind Load Structural Calculations per ASCE 7-93

START HERE

TEP No. 1

Establish wind load velocity pressure for exposure C or exposure D for shoreline areas



WINDLOAD ANALYSIS

A Poly Tek computer program for the engineer

The velocity pressure value shown in the chart below is based on the fastest mile wind speed design requirement and the mean roof height for each rectangle of the structure. *See Below

Design wind speed & exposure ENTER HERE

(Note: All wind velocity pressures are shown in pounds per square foot) VELOCITY PRESSURE VALUES ((Qz = 0.00256 x Kz x (IV)squared)) Importance factor, I=1.05

Note 1. Edge/Ridge Zone and End Zone calculation is thus; 10% of the endwall width or 40% of the mean roof height, whichever is smaller, but not less than either 3 feet or 4% of the longest wall.

The methods of determining the wind force generated reaction loads in this document utilizes the provisions of the ANSI / ASCE Standard 7-93, Minimum Design Loads for Buildings and Other Structures, Section 6, Wind Loads, 6.4.2 Analytical Procedure in accordance with 6.4.2.2 *Limitations of Analytical Procedure*. This method applies all appropriate factors and pressure coefficients applicable for the main wind force resisting system, end zones, overhangs, edge strips, walls, roofs, components and cladding as shown in Section 6, figures 1, 2, 3, & 4 and tables 4, 5, 6, 7, 8, 9, 10, 11 & 12. The velocity pressures shown in Step No. 1 have been calculated in accordance with Section 6.5.1 and modified for velocity pressure exposure coefficients and gust response factors relative to exposures C and D in compliance with Table 6 and Table 8 respectively.

The use of this document is restricted to buildings less than 60 feet high, subject to the same limitations as shown in Section 6.4.2.2 of the ASCE Standard 7-93 and must be completed under the direction and supervision of a registered professional engineer.

STEP No. 2 **Identify and Number:**

Note: Nomenclature assigned by truss companies may also be used except for girders & beams.

SAMPLE: A-T1 **(A= the roof Rectangle in which the truss T1 is located)**

On your roof framing plan, identify, by prefixes and number, all structural framing members.

Use the same prefix and number for all members which are identical in span and general design.

Prefixes are shown in the chart below.

Note: Mark all girder trusses and beams at their bearing points with "A" at one bearing point and "B" at the other bearing point. (Example: G1-A and G1-B for each end of a girder truss)

Item Description	Roof Truss	Roof Rafter	Hip Jack	Beam or Girder	Hip King Jack	O.S.Roof Corner	Opening Header	Gable Frame	Shear Wall (Int.)	End Wall	Side Wall
Rectangle Prefix +	T#	R#	J#	G#	K#	CR#	H#	GF#	X#	EW#	SW#

STEP No. 3 **Calculate wind uplift loads for structural roof framing members at both bearing points.**

List hip roof king-jacks after Step 4D is completed.Include hand framed Gables .

Note 2: The selection of the coefficient "C" must be from the chart shown on page 1 and is based first on the roof framing center distance, 16" or 24" on center; next the chart for the appropriate roof pitch angle must be used in conjuction with the roof frame member span length from bearing point to bearing point.

Follow calculation instructions at the bottom of the columns.

Important: Select the correct coeficient for each roof framing member based on the number of Edge or Ridge strip areas acting on that specific roof frame member. Typically, most hip jacks and some rafters have only one edge or ridge strip.

The load result of this calculation is the net uplift reaction vertical to the bearing point less the dead load reaction.

STEP No. 3 **Calculate wind uplift loads for structural roof framing members at both bearing points.**

List hip roof king-jacks after Step 4D is completed.Include hand framed Gables .

Note 2: The selection of the coefficient "C" must be from the chart shown on page 1 and is based first on the roof framing center distance, 16" or 24" on center; next the chart for the appropriate roof pitch angle must be used in conjuction with the roof frame member span length from bearing point to bearing point. **Important:** Select the correct coeficient for each roof framing member based on the **Follow calculation instructions** number of Edge or Ridge strip areas acting on that specific roof frame member. **at the bottom of the columns.** Typically, most hip jacks and some rafters have only one edge or ridge strip.

The load result of this calculation is the net uplift reaction vertical to the bearing point less the dead load reaction.

STEP No. 6A

Calculate Wind Load Values for all roof framing girder trusses and beams at their bearing points

(Do NOT list headers over ext. & int. bearing wall openings in this calculation step. See Step No. 7)

Note:Delete #N/A in "Loads from" column for rows not used.

Note:Place a 0 (w/o overhang) or a 1 (w/overhang) in line 13a & 13b.

List all roof frame members that bear their loads on the specific girder truss or beam I.D. No. listed below;

Girder Truss or Beam I.D. Number **G1**

Line #	Structural member I.D. No. on plans	Loads from Steps 3 & 5 Values which apply	MATH	Quantity of members with same I.D. No. bearing on this beam or truss		(Totals) Add lines 1 thru 10 & enter sum on line 11
1	K1	468	x	1	=	468
2	J1	458	x	5	=	2288
3		#N/A	x		=	0
4		#N/A	x		=	0
5		#N/A	x		=	0
6		#N/A	x		=	0
7		#N/A	x		=	0
8		#N/A	x		=	0
9		#N/A	x		=	0
10		#N/A	x		=	0
11	**Sub-Total**					2756
12	**Divide Line 11 by 2 =**					1378
13a	This member's uplift load from Steps 3 or 5 (End a.)				1	601
13b	This member's uplift load from Steps 3 or 5 (End b.)				1	601
14a	**Add Line 12 and Line 13a = (End a.)**					1979
14b	**Add Line 12 and Line 13b = (End b.)**					1979

List all roof frame members that bear their loads on the specific girder truss or beam I.D. No. listed below;

Girder Truss or Beam I.D. Number **G2**

Line #	Structural member I.D. No. on plans	Loads from Steps 3 & 5 Values which apply	MATH	Quantity of members with same I.D. No. bearing on this beam or truss		(Totals) Add lines 1 thru 10 & enter sum on line 11
1	K1	468	x	1	=	468
2	J1	458	x	10	=	4576

13b	This member's uplift load from Steps 3 or 5 (End b.)				0	587
14a	**Add Line 12 and Line 13a = (End a.)**					2026
14b	**Add Line 12 and Line 13b = (End b.)**					2026

NOTE

Any girder truss or beam bearing point that has a continuous vertical load path to the foundation is a primary bearing point load. Any girder truss or beam bearing point that bears its load upon another girder truss or beam is a contributory bearing point load.
All girder trusses and beams which do NOT have other girder trusses or beams bearing their load upon them can now be listed with their Step 6A, Line 14a. or b. load values in the Connector Specification Chart.

STEP No. 6B — **Establish contributory load values imposed upon girder trusses or beams based on the bearing point location along the span.**

List Girder truss or Beam bearing on another Girder Truss or Beam: I.D. No.	End A or B	Uplift Load at Bearing point	List Girder truss or Beam which is receiving the load: I.D. No.		SPAN brg. to brg.	Divide the LOAD by the SPAN. Equals lbs per Lin.Ft.

List I.D. numbers of all Opening Headers along with their respective Line #6 load values on the Connector Specification Chart.

STEP No. 8 Note: After ID Number *(except Girders)* indicate "0" is *without* overhang or "1" is *with* overhang

EXCEPTION: Indicate "0" for roof frame member END that extends over open area and "1" for opposite end.

Calculate lateral loads perpendicular and horizontal to bearing surface for all roof frame members.

General Information

Note 1. This calculation compensates for bi-lateral shear forces generating torsion on the diaphragm.

Note 2. See Engineer's Select-A-Spec for wall stud size, stud center distance and stud material with species.

Note 3. See Engineer's Select-A-Spec for wall sheathing diaphragm thickness, sheathing material, nail size and nailing center distance.

STEP No. 9C Calculate Uplift Shear Loads for all Wood Frame Walls (plf)

This step will determine if uplift loads exceed the shear capacity of the specified wall diaphragm and nailing.

***** Omit any roof structural member having a direct vertical connector tie to the foundation, such as girders, beams & headers.***

GABLE END WALL NOTES:

Gable Wall requirements with VAULTED ceilings:
Framed walls must be continuous floor to roof, masonry walls to be continuous or have wood gables secured to a level bond beam.

SPECIAL BRACING:
All ceiling support members within 8 feet of the exterior gable wall must have 2x4 blocking between them at 48" on center, plus crossed diagonal 2x4 bracing from ceiling line to roof diaphragm at 8 feet on center.
If the ridge height of a gable truss exceeds 8 ft. above the flat ceiling line, a wood gable shall be hand framed with 2 x [GG] at 16 " O.C..

Masonry endwalls may have wood truss or hand framed gable with 2x8 P.T. Pine sill bolted to bond beam with 1/2" dia anchor bolts at the following centers per wind velocity (mph)

Velocity	up to 101	101 to 120	121 to 140
Bolt Ctrs.	4 feet	3 feet	2 feet

Extreme fiber in bending, fb = 1000 if < 101 mph
Extreme fiber bending = 1200 if >101 & < 121 mph
Extreme fiber bending = 1400 if >121 & < 141 mph

Gable end wall requirements with FLAT Ceilings:
All gable end walls must be continuous framed or continuous masonry from the floor to the flat ceiling line.

[GG]	Wind (mph) Velocity	Maximum Gable Ridge Height Above Ceiling: 8 Feet	10 feet	12 feet	14 feet	16 feet	18 feet
Gable Stud Size	up to 100	2x4	2x4	2x6	2x6	2x6	2x8
	101 to 120	2x4	2x6	2x8	2x8	2x8	2x10
	121 to 140	2x6	2x8	2x8	2x8	2x10	2x10

Remarks: ALL STUD TO TOP PLATE CONNECTIONS SHALL BE AT 4'-0" MAX. CENTER DISTANCE & USE A HUGHES PART NUMBER TP 6X WITH 8 #10d NAILS 1-1/2" LG.

WHERE TP 6X CONNECTOR IS USED AT BOTTOM OF HEADER JACK STUDS ANOTHER TP 6X CONNECTOR WITH SAME NAIL SPECIFICATION MUST BE INSTALLED ABOVE AT DOUBLE TOP PLATE TO HEADER

Designer's Specifications for Wood and Masonry Construction including Roof Sheathing:

Notes: All fastenings must be in strict compliance with the 1994 S.B.C.C.I. Code "2306" and, or meet local requirements.
All Wood Construction must conform to the provisions of Chapter 23 in the 1994 S.B.C.C.I. Standard Building Code and, or meet the local requirements of any other applicable code or code amendments adopted by the community in which this specific structure is being constructed, unless otherwise specified by the engineer.
All Masonry Construction must conform to the provisions of Chapter 21 in the 1994 S.B.C.C.I. Standard Building Code and, or meet the local requirements of any other applicable code or code amendments adopted by the community in which this specific structure is being constructed, unless otherwise specified by the engineer.

Any specification shown hereon shall supersede any conflicting specification shown on the submitted drawings.

Masonry and Wood Const. Roof sheathing to be:		Wood Construction: Single story or two story 2nd floor wall sheathing & studs		Wood Construction: Two story first floor wall sheathing & studs		Masonry Construction of Hollow Load Bearing Units: Single story or two story 2nd floor wall const.		Masonry Construction of Hollow Load Bearing Units: First floor wall construction for a two story structure

This Engineer certifies that I have directed, supervised and reviewed these Wind Load Calculations and declare that the wind load values, connector specifications and material specifications shown hereon have been properly determined by the provisions of ASCE Standard 7-93, Section 6, for this specific structure. An impact resistance code has not been specified by this engineer for the exterior window and door openings of this structure. Storm panels are recommended.

Note: This ENGINEER has delegated other engineers to design and certify the structural credibility of any pre-engineered and manufactured structural building components or roof / floor truss systems including required connectors (factory or field installed) which are intrinsically associated parts of the components or truss systems.

ENGINEER'S SPECIAL INSTRUCTIONS & REMARKS:

This Engineer performed these wind load calculations only, and should not to be considered the Engineer of Record with total responsibility for all specifications relative to this entire structure and specific site location including energy code, electrical, plumbing, HVAC, soil conditions, survey & drainage unless otherwise indicated.

RIGHT-J CALCULATION PROCEDURES A, B, C, D

Job #: Herrick, Lucido Res. File name: Herrich, Luc 6/25/98
Zone: Entire House

Procedure A - Winter Infiltration HTM Calculation*

1.	Winter Infiltration CFM				
	0.8 AC/HR x	16870 Cu.Ft. x 0.0167 =		225	CFM
2.	Winter Infiltration Btuh				
	1.1 x	225 CFM x	25 Winter TD =	6198	Btuh
3.	Winter Infiltration HTM				
	6198 Btuh /	407 Total Window and Door Area =		15.2	HTM

Procedure B - Summer Infiltration HTM Calculation*

1.	Summer Infiltration CFM				
	0.4 AC/HR x	16870 Cu.Ft. x 0.0167 =		113	CFM
2.	Summer Infiltration Btuh				
	1.1 x	113 CFM x	20 Summer TD =	2479	Btuh
3.	Summer Infiltration HTM				
	2479 Btuh /	407 Total Window and Door Area =		6.1	HTM

Procedure C - Latent Infiltration Gain

0.68 x	60 gr.diff. x	113 CFM =	4598	Btuh

Procedure D - Equipment Sizing Loads

1.	Sensible Sizing Load				
	Sensible Ventilation Load				
	1.1 x 0 Vent.CFM x	20 Summer TD	=	0	Btuh
	Sensible Load for Structure (Line 19)		+	38163	Btuh
	Sum of Ventilation and Structure Loads		=	38163	Btuh
	Rating and Temperature Swing Multiplier		x	1.00	RSM
	Equipment Sizing Load - Sensible		+	38163	Btuh
2.	Latent Sizing Load				
	Latent Ventilation Load				
	0.68 x 0 Vent.CFM x	60 gr.diff.	=	0	Btuh
	Internal Loads = 230 x	23 No. People	+	5290	Btuh
	Infiltration Load From Procedure C		+	4598	Btuh
	Equipment Sizing Load - Latent		=	9888	Btuh

*Construction Quality is: a No. of Fireplaces is: 0

RIGHT-J CALCULATION PROCEDURES A, B, C, D

Job #: Herick,Lucido Res. 2nd FL File name: Herick, Luci 2/26/98
Zone: Entire House

Procedure A - Winter Infiltration HTM Calculation*

1.	Winter Infiltration CFM					
	0.8 AC/HR x	17244	Cu.Ft. x 0.0167 =		230	CFM
2.	Winter Infiltration Btuh					
	1.1 x	230 CFM x	25	Winter TD =	6335	Btuh
3.	Winter Infiltration HTM					
	6335 Btuh /	488	Total Window and Door Area =		13.0	HTM

Procedure B - Summer Infiltration HTM Calculation*

1.	Summer Infiltration CFM					
	0.4 AC/HR x	17244	Cu.Ft. x 0.0167 =		115	CFM
2.	Summer Infiltration Btuh					
	1.1 x	115 CFM x	20	Summer TD =	2534	Btuh
3.	Summer Infiltration HTM					
	2534 Btuh /	488	Total Window and Door Area =		5.2	HTM

Procedure C - Latent Infiltration Gain

0.68 x	60	gr.diff. x	115	CFM =	4700 Btuh

Procedure D - Equipment Sizing Loads

1.	Sensible Sizing Load					
	Sensible Ventilation Load					
	1.1 x 0 Vent.CFM x	20	Summer TD	=	0	Btuh
	Sensible Load for Structure (Line 19)			+	35750	Btuh
	Sum of Ventilation and Structure Loads			=	35750	Btuh
	Rating and Temperature Swing Multiplier			x	1.00	RSM
	Equipment Sizing Load - Sensible			+	35750	Btuh
2.	Latent Sizing Load					
	Latent Ventilation Load					
	0.68 x 0 Vent.CFM x	60	gr.diff.	=	0	Btuh
	Internal Loads = 230 x	5	No. People	+	1150	Btuh
	Infiltration Load From Procedure C			+	4700	Btuh
	Equipment Sizing Load - Latent			=	5850	Btuh

*Construction Quality is: a No. of Fireplaces is: 0

WHEREAS, pursuant to the provisions of, and governed by, Sections 0307.6 and 4504.6 of the South Florida Building Code as adopted in Section 4-16 of the Codes and Ordinances of the Town of Sewall's Point, temporary electrical service for use during building operations and for testing purposes under a valid building permit is authorized under prescribed terms and conditions; and,

WHEREAS, the above named responsible persons, firms or corporations have requested a temporary electrical hook-up of ~~LIGHTS, POOL EQUIPTMENT~~ & A/C for the purpose of TESTING ~~AND COMPLETION OF HOUSE~~ at the above designated construction now in progress under a valid building permit; and

WHEREAS, it is necessary to have a temporary electric hook-up for testing of equipment and completion of building operations as herein above described.

NOW THEREFORE IT IS AGREED BY AND BETWEEN THE PARTIES THAT;

1. The parties to this agreement are Edwin B. Arnold, Building Official, Town of Sewall's Point, and the above named responsible persons, firms or corporations.

2. In order to allow electrical service to be provided to certain equipment being placed at the referenced construction address the Building Official hereby agrees to grant a temporary hook-up permit.

3. This temporary hook-up permit shall be effective for 30 calendar days from the date of this agreement, after which time the temporary hook-up will be revoked or a Certificate of Occupancy will be issued to verify completion.

4. This temporary electric hook-up is solely for the purposes stated. No furniture or occupants will be moved into the building until a Certificate of Occupancy is issued.

11/1/99 IN WITNESS WHEREOF the parties have caused this agreement to be executed this 15th day of October, 99

RE: 2 Sabal Court
Permit Number ~~B98~~ 4503

The final survey submitted on the referenced project indicates an apparent (undimensioned) encroachment of the pool deck into the side and rear set back areas of the property. Having only received the survey the prior afternoon, I pointed this out to Mr. Lucido at our meeting last Wednesday when the permit was renewed, and he indicated that he had obtained an opinion (this would certainly have been prior to my appointment) that this was permissible - apparently under a theory that brick pavers bedded in sand were not "permanent". I deferred further comment pending the site inspection scheduled for that date and review of the file and applicable ordinances. The results of my inspection, review, research and analysis are as follows:

1. The original permit was issued for the building only; the courtyard, pool and deck were neither reviewed or permitted at that time.
2. Upon application, a separate fee permit was issued by me for construction of a courtyard area with surrounding walls. A final inspection of this construction was performed at the time of the C.O. inspection on Wednesday, and it is in compliance with permit documents and set back requirements.
3. Upon application, a separate fee permit was issued by me for construction of a pool located in the southeast portion of the site. The pool was located within the set backs as required; the pool contractor specifically excluded the deck from his application and I noted that a separate permit would be required. It should be noted that the pool was sited sufficiently within the setbacks to allow a perimeter deck.

One South Sewall's Point Road, Sewall's Point, Florida 34996
Town Hall (561) 287-2455 • Fax (561) 220-4765 • E-Mail: clerk@sewallspoint.org
Police Department (561) 781-3378 • Fax (561) 286-7669 • E-Mail: police@sewallspoint.org

4. The pool permit is still open; a final inspection has not been requested by the pool contractor.
5. Although the pool deck has been completed, with the encroachments previously noted, no application for the required pool deck permit has been submitted.

Our Zoning Ordinance (Appendix B, Section XI, E.1) specifically provides that:

"swimming pools, poolside aprons, and terraces ... shall be subject to building set back line regulations."

This is consistent with, and reinforced by, the definition of a structure as:

"(a)nything constructed or erected, the use of which requires pèrmanent location on the land ... (A)ny open patio ... or an apron adjacent to a swimming pool shall be considered a structure for the purpose of this Ordinance and for the purpose of determining setback lines."

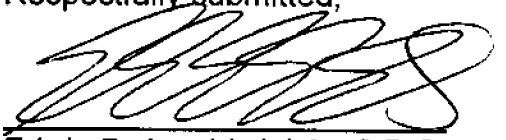
It is permanence rather than materials of construction which determines when structures must comply with set back requirements. Here, the pool deck is clearly intended to be permanent, a determination reflected in my requirement that a permit be issued for construction. Supporting this position, we find temporary structures defined as:

"(a)nything constructed or erected, the design of which or intended use of which, is other than long term, indefinite life design or use."

Addressing Mr. Lucido's assertion of prior verbal authorization, I can only note that the Ordinance is clear on its face and my position on this issue has been consistent. Further, at no time did any submittal indicate an intent to act upon any interpretation of the set back requirements other than in full compliance, and the work was completed without obtaining the required permit.

Field inspection of the pool deck as installed shows it to be of substantial construction, clearly intended to be "permanent" within the sense of both the Ordinances and ordinary usage. As such, it is my position as Building Official that it must be permitted (as previously requested) and included within the total scope of construction work; all set back requirements must be complied with prior to final inspection. This is a zoning issue; should a contrary position be taken, I shall of course defer to the Commission and legal opinion of counsel.

Respectfully submitted,



Edwin B. Arnold, A.I.A., C.B.O.

TREE REMOVAL (Attach sealed survey)
No.of trees to be removed_____No.to be retained_____No. to be planted___
Specimen tree removed_____Fee_____Authorized/Date_____
DEVELOPMENT ORDER #_____

1. ALL APPLICATIONS REQUIRE:

A. Property Appraiser's Parcel Number.
B. A Legal Description of your property. (Can be found on your deed survey or Tax Bill.)
C. Contractor's name, address, phone number & license numbers.
D. Name all sub-contractors (properly licensed).
E. Current Survey
F. Take completed application to the Permits and Inspections Office for approval. Provide construction details and a plot plan(s) showing setbacks, yard coverage, parking and position of all buildings on the property, stormwater retention plan, etc. Compliance with subdivision regulations can also be determined at this time.
3. Take the application showing Zoning approval (complete with plans & plot plan) to the Health Department for septic tank. Attach the pink copy to the building application.
4. Return all forms to the Permits and Inspection Office. All planned construction requires: two (2) sets of plans, drawn to scale with engineer's or architect's seal and the following items:

1. Floor Plan
2. Foundation Details
3. Elevation Views - Elevation Certificate due after slab inspection.
4. A Plot Plan (show desired floor elevation relative to Sea Level in front of building, plus location of driveway).
5. Truss layout
6. Vertical Wall Sections (one detail for each wall that is different)
7. Fireplace drawing: If prefabricated submit manufacturers data.

ADDITIONAL Required Documents are:

1. Use Permit (for driveway connection to public Right of Way). Return form with plot plan showing driveway location (Atlantic Ave. only).
2. Well Permit or information on existing well & pump.
3. Flood Hazard Elevation (if applicable).
4. Energy Code Compliance Certification plus any Approved Forms and/or Energy Code Compliance Sheets.
5. Statement of Fact (for Homeowner Builder), and proof of ownership - (Deed or Tax receipt).
6. Irrigation Sprinkler System layout showing location of heads, valves, etc.
7. A certified copy of the Notice of Commencement must be filed in this office and posted at the job site prior to the first inspection.
9. Replat required upon completion of slab or footing inspection and prior to any further inspections.

NOTICE: In addition to the requirements of this permit, there may be additional restrictions applicable to this property that may be found in the public records of COUNTY OF MARTIN, and there may be additional permits required from other governmental entities such as water management districts, state and federal agencies.

1. ALL APPLICATIONS REQUIRE:

A. Property Appraiser's Parcel Number.
B. A Legal Description of your property. (Can be found on your deed survey or Tax Bill.)
C. Contractor's name, address, phone number & license numbers.
D. Name all sub-contractors (properly licensed).
E. Current Survey
F. Take completed application to the Permits and Inspections Office for approval. Provide construction details and a plot plan(s) showing setbacks, yard coverage, parking and position of all buildings on the property, stormwater retention plan, etc. Compliance with subdivision regulations can also be determined at this time.

3. Take the application showing Zoning approval (complete with plans & plot plan) to the Health Department for septic tank. Attach the pink copy to the building application.
4. Return all forms to the Permits and Inspection Office. All planned construction requires: two (2) sets of plans, drawn to scale with engineer's or architect's seal and the following items:

1. Floor Plan
2. Foundation Details
3. Elevation Views - Elevation Certificate due after slab inspection.
4. A Plot Plan (show desired floor elevation relative to Sea Level in front of building, plus location of driveway).
5. Truss layout
6. Vertical Wall Sections (one detail for each wall that is different)
7. Fireplace drawing: If prefabricated submit manufacturers data.

ADDITIONAL Required Documents are:

1. Use Permit (for driveway connection to public Right of Way). Return form with plot plan showing driveway location (Atlantic Ave. only).
2. Well Permit or information on existing well & pump.
3. Flood Hazard Elevation (if applicable).
4. Energy Code Compliance Certification plus any Approved Forms and/or Energy Code Compliance Sheets.
5. Statement of Fact (for Homeowner Builder), and proof of ownership - (Deed or Tax receipt).
6. Irrigation Sprinkler System layout showing location of heads, valves, etc.
7. A certified copy of the Notice of Commencement must be filed in this office and posted at the job site prior to the first inspection.
9. Replat required upon completion of slab or footing inspection and prior to any further inspections.

NOTICE: In addition to the requirements of this permit, there may be additional restrictions applicable to this property that may be found in the public records of COUNTY OF MARTIN, and there may be additional permits required from other governmental entities such as water management districts, state and federal agencies.

PRODUCT CONTROL NOTICE OF ACCEPTANCE

Madden Manufacturing
1889 NW 22nd Street
Pompano Beach FL 33069

Your application for Product Approval of:
20 Ga. Galvanized Steel Storm Panel Shutter
under Chapter 8 of the Code of Miami-Dade County governing the use of Alternate Materials and Types of Construction, and completely described herein, has been recommended for acceptance by the Miami-Dade County Building Code Compliance Office (BCCO) under the conditions specified herein.

This approval shall not be valid after the expiration date stated below. BCCO reserves the right to secure this product or material at anytime from a jobsite or manufacturer's plant for quality control testing.
If this product or material fails to perform in the approved manner, BCCO may revoke, modify, or suspend the use of such product or material immediately. BCCO reserves the right to revoke this approval, if it is determined BCCO that this product or material fails to meet the requirements of the South Florida Building Code.

The expense of such testing will be incurred by the manufacturer.

Acceptance No.: 98-1110.05

Expires: 05/01/2003

Raul Rodriguez
Chief Product Control Division

THIS IS THE COVERSHEET, SEE ADDITIONAL PAGES FOR SPECIFIC AND GENERAL CONDITIONS

BUILDING CODE & PRODUCT REVIEW COMMITTEE

This application for Product Approval has been reviewed by the BCCO and approved by the Building Code and Product Review Committee to be used in Dade County, Florida under the conditions set forth above.

Francisco J. Quintana, R.A.
Director
Miami-Dade County
Building Code Compliance Office

Approved: 06/16/1999

Madden Manufacturing Co.

ACCEPTANCE No. : 98-1110.05

APPROVED : JUN 16 1999

EXPIRES : 05/01/2003

NOTICE OF ACCEPTANCE: SPECIFIC CONDITIONS

1. SCOPE

This revises and renews the Notice of Acceptance No. 96-0520.04, which was issued on May 1, 1997. It approves a 20 gauge galvanized steel storm panels shutter, as described in Section 2 of this Notice of Acceptance, designed to comply with the South Florida Building Code, 1994 Edition for Miami-Dade County, for the locations where the pressure requirements, as determined by SFBC Chapter 23, do not exceed the Design Pressure Rating values indicated in the approved drawings.

2. PRODUCT DESCRIPTION

This 20 gauge galvanized steel storm panels shutter and its components shall be constructed in strict compliance with the following documents: Drawing No. 96-87, titled "20 Ga. Galvanized Steel Storm Panel", prepared by Knezevich & Associates, Inc., dated April 22, 1996, last revision #4 dated March 4, 1999, sheets 1 through 6 of 6, signed and sealed by V. J. Knezevich, P.E., bearing the Miami-Dade County Product Control Approval stamp with the Notice of Acceptance number and approval date by the Miami-Dade County Product Control Division. These documents shall hereinafter be referred to as the approved drawings.

3. LIMITATIONS

All permanent set components, included but not limited to embedded anchor bolts, threaded cones, metal shields, headers and sills, must be protected against corrosion, contamination and damage at all times.

4. INSTALLATION

This 20 gauge galvanized steel storm panels shutter and its components shall be installed in strict compliance with the approved drawings.

5. LABELING

Each panel shall bear a permanent label with the manufacturer's name or logo, city, state and the following statement: "Miami-Dade County Product Control Approved".

6. BUILDING PERMIT REQUIREMENTS

6.1 Application for building permit shall be accompanied by copies of the following:

- 6.1.1 This Notice of Acceptance.
- 6.1.2 Duplicate copies of the approved drawings, as identified in Section 2 of this Notice of Acceptance, clearly marked to show the components selected for the proposed installation.
- 6.1.3 Any other documents required by the Building Official or the South Florida Building Code (SFBC) in order to properly evaluate the installation of this system.

Helmy A. Makar, P. E. - Product Control Examiner
Product Control Division

Madden Manufacturing Co.

ACCEPTANCE No. : 98-1110.05

APPROVED : JUN 16 1999

EXPIRES : 05/01/2003

NOTICE OF ACCEPTANCE: STANDARD CONDITIONS

1. Renewal of this Acceptance (approval) shall be considered after a renewal application has been filed and the original submitted documents, including test-supporting data, engineering documents, are no older than eight (8) years.

2. Any and all approved products shall be permanently labeled with the manufacturer's name, city, state, and the following statement: "Miami-Dade County Product Control Approved", or as specifically stated in the specific conditions of this Acceptance.

3. Renewals of Acceptance will not be considered if:
   a. There has been a change in the South Florida Building Code affecting the evaluation of this product and the product is not in compliance with the code changes.
   b. The product is no longer the same product (identical) as the one originally approved.
   c. If the Acceptance holder has not complied with all the requirements of this acceptance, including the correct installation of the product.
   d. The engineer, who originally prepared, signed and sealed the required documentation initially submitted, is no longer practicing the engineering profession.

4. Any revision or change in the materials, use, and/or manufacture of the product or process shall automatically be cause for termination of this Acceptance, unless prior written approval has been requested (through the filing of a revision application with appropriate fee) and granted by this office.

5. Any of the following shall also be grounds for removal of this Acceptance:
   a. Unsatisfactory performance of this product or process.
   b. Misuse of this Acceptance as an endorsement of any product, for sales, advertising or any other purposes.

6. The Notice of Acceptance number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the Notice of Acceptance is displayed, then it shall be done in its entirety.

7. A copy of this Acceptance as well as approved drawings and other documents, where it applies, shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at all time. The engineer needs not reseal the copies.

8. Failure to comply with any section of this Acceptance shall be cause for termination and removal of Acceptance.

9. This Notice of Acceptance consists of pages 1, 2 and this last page 3.

END OF THIS ACCEPTANCE

APPROVED AS COMPLYING WITH THE SOUTH FLORIDA BUILDING CODE
DATE June 16 1999
BY Helena A. Martin
PRODUCT CONTROL DIVISION
BUILDING CODE COMPLIANCE OFFICE
ACCEPTANCE NO. 98-1110.05

MAR 1 0 1999

GENERAL NOTES:

1. THIS STORM PANEL SHUTTER SYSTEM IS DESIGNED AND TESTED IN ACCORDANCE WITH THE SOUTH FLORIDA BUILDING CODE 1994 EDITION.
2. POSITIVE AND NEGATIVE DESIGN PRESSURE CALCULATIONS SHALL BE PERFORMED FOR SPECIFIC JOBS IN ACCORDANCE WITH ASCE 7-88 "MINIMUM DESIGN LOADS FOR BUILDINGS AND OTHER STRUCTURES." TABLES SHALL BE REFERENCED AT APPROPRIATE DESIGN LOADS.
3. PRODUCT MARKINGS SHALL BE WITHIN 12" OF ONE END OF THE PANEL WITH A MIN. OF ONE-MARKING PER PANEL AND SHALL BE LABELED AS FOLLOWS:
   MADDEN MFG CO.
   POMPANO BEACH, FL
   DADE COUNTY PRODUCT CONTROL APPROVED
4. PANELS HAVE BEEN TESTED IN ACCORDANCE WITH THE DADE COUNTY PROTOCOLS PA 201, PA 202, & PA203. DESIGN IS BASED ON CONSTRUCTION TESTING CORPORATION (CTC) TEST REPORT No. 96-012.
5. STORM PANELS SHALL BE 20 GAUGE STEEL (t=0.035") CONFORMING TO ASTM A446, STRUCTURAL QUALITY, GRADE C, WITH A MIN Fy = 40 KSI GALVANIZED IN ACCORDANCE WITH ASTM G-60. ALL ALUMINUM EXTRUSIONS SHALL BE 6063-T6 U.O.N.
6. ALL SCREWS AND BOLTS TO BE 2024-T4 ALUMINUM ALLOY, STAINLESS STEEL, OR GALVANIZED STEEL WITH A 33 KSI MINIMUM YIELD STRENGTH.
7. FOR INSTALLATIONS 30 FT. OR LESS ABOVE GRADE, AN OPTIONAL 1" x 1" x 18 GAGE STEEL BAR MAY BE USED TO CONTROL DEFLECTION OF STORM PANEL SYSTEM. STEEL BAR MAY BE FASTENED AT PANEL OVERLAPS, AT MIDSPAN, W/ 1/4-20 x 4" BOLTS AND DIE CAST ALUM. WASHERED WINGNUTS. SEE MIN. SEPARATION FROM GLASS SCHEDULE, PAGE 4 OF 6, FOR REDUCED SEPARATIONS.
8. TOP AND BOTTOM DETAILS MAY BE INTERCHANGED AS FIELD CONDITIONS REQUIRE. PANELS MAY ALSO BE MOUNTED WITH "E" OR "F" TRACK, STUDDED ANGLE OR DIRECT MOUNT HORIZONTALLY.
9. THE PERMIT HOLDER SHALL VERIFY THE ADEQUACY OF THE EXISTING STRUCTURE TO SUSTAIN THE NEW SUPERIMPOSED LOADS AND TO VERIFY ALL DIMENSIONS AT THE JOB SITE BEFORE COMMENCING WITH THE WORK.
10. ANCHORS SHALL BE INSTALLED IN ACCORDANCE WITH MANUFACTURER'S RECOMMENDATIONS. EMBEDMENT LENGTHS SHALL BE AS NOTED AND DO NOT INCLUDE STUCCO OR OTHER FINISHES.
11. AT LEAST ONE WARNING NOTE PER OPENING SHALL BE PLACED IN A CONSPICUOUS LOCATION ON ANY OF THE COMPONENTS OF STORM PANELS SYSTEM ADVISING THE HOME OWNER OR TENANT THAT "STORM PANELS WILL NOT OFFER HURRICANE PROTECTION UNLESS STEEL TUBE & BOLTS ARE PROPERLY INSTALLED WHEN NEEDED".

ANCHOR NOTES:

1. SPANS AND LOADS SHOWN HERE ARE FOR DETERMINING ANCHOR SPACING ONLY. ALLOWABLE STORM PANEL SPANS FOR SPECIFIC LOADS MUST BE LIMITED TO THOSE SHOWN IN TABLE 1, SHEET 6.
2. ENTER ANCHOR SCHEDULE BASED ON THE EXISTING STRUCTURE MATERIAL, ANCHOR TYPE AND EDGE DISTANCE. SELECT DESIGN LOAD GREATER THAN OR EQUAL TO NEGATIVE DESIGN LOAD ON SHUTTER AND SELECT SPAN GREATER THAN OR EQUAL TO SHUTTER SPAN.
3. EXISTING STRUCTURE MAY BE CONCRETE, HOLLOW BLOCK OR WOOD FRAMING. REFERENCE ANCHOR SCHEDULE FOR PROPER ANCHOR TYPE BASED ON TYPE OF EXISTING STRUCTURE AND APPROPRIATE CONNECTION TYPE. SEE MOUNTING SECTION DETAILS FOR IDENTIFICATION OF CONNECTION TYPE.
4. ANCHORS SHALL BE INSTALLED IN ACCORDANCE WITH MANUFACTURERS' RECOMMENDATIONS.
5. MINIMUM EMBEDMENT AND EDGE DISTANCE EXCLUDES WALL FINISH OR STUCCO.
6. WHERE EXISTING STRUCTURE IS WOOD FRAMING, WOOD FRAMING CONDITIONS VARY. FIELD VERIFY THAT FASTENERS ARE INTO ADEQUATE WOOD FRAMING MEMBERS, NOT PLYWOOD.
7. WHERE LAG SCREWS FASTEN TO NARROW FACE OF STUD FRAMING, FASTENER SHALL BE LOCATED IN CENTER OF NOMINAL 2" x 4" (MIN.) WOOD STUD. 3/4" EDGE DISTANCE IS ACCEPTABLE FOR WOOD FRAMING. WOOD STUD SHALL BE "SOUTHERN PINE" G=0.55 OR GREATER DENSITY. LAG SCREWS SHALL HAVE PHILLIPS PAN HEAD OR HEX HEAD.
8. MACHINE SCREWS SHALL HAVE MINIMUM OF 1/2" ENGAGEMENT OF THREADS IN BASE ANCHOR AND MAY HAVE EITHER A PAN HEAD, TRUSS HEAD, OR WAFER HEAD (SIDEWALK BOLT), U.O.N.

9 [ ] DESIGNATES ANCHOR CONDITIONS WHICH ARE NOT ACCEPTABLE USES.

★10. DESIGNATES ANCHORS WHICH ARE REMOVABLE BY REMOVING MACHINE SCREW, NUT OR WASHERED WINGNUT. REMOVABLE ANCHORS ARE REQUIRED FOR DIRECT MOUNT @ 6" O.C. OR 12" O.C. MAX. SPACING ONLY. SPACINGS SHALL NOT EXCEED VALUE SPECIFIED IN ANCHOR SCHEDULE. LOCATE FASTENER IN NARROW PORTION OF KEYHOLE SLOT OR KEYHOLE WASHER.

11. 1/4-20 TRUSS HEAD BOLTS MAY BE USED IN LIEU OF 1/4-20 SIDEWALK BOLT IF ⑩ KEYHOLE WASHERS ARE USED.

NOTICES TO OWNERS AND CONTRACTORS:

1. YOUR FAILURE TO RECORD A NOTICE OF COMMENCEMENT MAY RESULT IN YOUR PAYING TWICE FOR IMPROVEMENTS TO YOUR PROPERTY. WHEN FINANCING, CONSULT WITH YOUR LENDER OR AN ATTORNEY BEFORE RECORDING YOUR NOTICE OF COMMENCEMENT.
2. THERE ARE SOME PROPERTIES THAT MAY HAVE DEED RESTRICTIONS RECORDED UPON THEM. THESE RESTRICTIONS MAY LIMIT OR PROHIBIT THE WORK APPLIED FOR IN YOUR BUILDING PERMIT. IT IS YOUR RESPONSIBILITY TO DETERMINE IF YOUR PROPERTY IS ENCUMBERED BY ANY RESTRICTIONS. SOME RESTRICTIONS APPLICABLE TO THIS PROPERTY MAY BE FOUND IN THE PUBLIC RECORDS OF MARTIN COUNTY OR THE TOWN OF SEWALL'S POINT, THERE MAY BE ADDITIONAL PERMITS REQUIRED FROM OTHER GOVERNMENTAL ENTITIES SUCH AS WATER MANAGEMENT DISTRICTS, STATE AGENCIES, OR FEDERAL AGENCIES.
3. BUILDING PERMITS FOR SINGLE FAMILY RESIDENCES AND SUBSTANTIAL IMPROVEMENTS TO SINGLE FAMILY RESIDENCES ARE VALID FOR A PERIOD OF 24 MONTHS. RENEWAL FEES WILL BE ASSESSED AFTER 24 MONTHS PER TOWN ORDINANCE 50-95.
4. THIS PERMIT WILL BECOME *NULL AND VOID* IF THE WORK AUTHORIZED BY THIS PERMIT IS NOT COMMENCED WITHIN 180 DAYS, OR IF WORK IS SUSPENDED OR ABANDONED FOR A PERIOD OF 180 DAYS AT ANY TIME AFTER THE WORK IS COMMENCED. ADDITIONAL FEES WILL BE ASSESSED ON ANY PERMIT THAT BECOMES NULL AND VOID. REF. FBC 2004 W/ 2006 REVISIONS SECT. 105.4.1, 105.4.1.1 - .5.

*******A FINAL INSPECTION IS REQUIRED ON ALL BUILDING PERMITS********

APPLICATION IS HEREBY MADE TO OBTAIN A PERMIT TO DO THE WORK AND INSTALLATIONS AS SPECIFICALLY INDICATED ABOVE. I CERTIFY THAT NO WORK OR INSTALLATION HAS COMMENCED PRIOR TO THE ISSUANCE OF A PERMIT AND THAT THE INFORMATION I HAVE FURNISHED ON THIS APPLICATION IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE. I AGREE TO COMPLY WITH ALL APPLICABLE CODES, LAWS, AND ORDINANCES OF THE TOWN OF SEWALL'S POINT DURING THE BUILDING PROCESS.

Congratulations! With this license you become one of the nearly one million Floridians licensed by the Department of Business and Professional Regulation. Our professionals and businesses range from architects to yacht brokers, from boxers to barbeque restaurants, and they keep Florida's economy strong.

Every day we work to improve the way we do business in order to serve you better. For information about our services, please log onto **www.myfloridalicense.com**. There you can find more information about our divisions and the regulations that impact you, subscribe to department newsletters and learn more about the Department's initiatives.

Our mission at the Department is: License Efficiently, Regulate Fairly. We constantly strive to serve you better so that you can serve your customers. Thank you for doing business in Florida, and congratulations on your new license!

FLORIDA ENERGY CONSERVATION CODE

Mandatory Duct Inspection Certification for HVAC change-out

For use when part of the duct and/or HVAC system has been replaced (Section 101.4.7.1.1 & FS 553.912)

Owner: LUCIDO THOMAS & DIERDRE Contractor name: Forward Electric & AC

Street address: 2 SABAL CT Jurisdiction: Sewalls Point

City: STUART Permit No.: _____

Zip: 34996 Final inspection date: _____

I certify that I have inspected the duct work associated with the HVAC unit referenced by the permit listed above and found it complies with the requirements of Section 101.4.7.1.1 as indicated below:

- [x] Where needed, the existing ducts have been sealed using reinforced mastic or code-approved equivalent.
- [ ] Ducts are located within conditioned space. (Section 101.4.7.1.1 exception 1)
- [ ] The joints or seams are already sealed with fabric and mastic (Section 101.4.7.1.1 exception 2)
- [ ] System was tested (see below) and repairs were made as necessary – (Section 101.4.7.1.1 exception 3)

Signature: _____ Date: 4/29/15

Printed Name: William M Carson

Contractor License #: CAC1816767

I certified I have tested the replaced air distribution system(s) referenced by the permit listed above at a pressure differential of 25 Pascals (0.10 in. w.c.).

DESIGN NOTES:

Wind loads per ASCE 7-10 for solid freestanding structures at grade:
ASD Loads coeff = 0.6
Wind Speed & Exposure as noted in design schedules.
Condensing unit height: 15 ft max above grade
Kzt=1.0, Kd=0.85, G=0.85
Cf=1.55 (H/W ratio ≤ 1.3)

GENERAL NOTES:

1. Design is in accordance with the requirements of the 2010 Florida Building Code for use within & outside the High Velocity Hurricane Zone (HVHZ).
2. This engineering certifies only the structural integrity of those systems, components, and/or other construction explicitly specified herein.
3. The existing host structure must be capable of supporting the loaded system as verified by building department or architect / engineer of record. No warranty, either expressed or implied, is contained herein.
4. Systems shall be as noted herein. All references to components, extrusions, & other installation criteria shall conform to that of applicable product approval &/or mfr's specs.
5. Where site conditions deviate from those shown in this plan, revisions may be required or a separate site-specific engineering evaluation performed.
6. Engineer seal affixed hereto validates structural design as shown only. Use of this specification by contractor, et. al. indemnifies & saves harmless this engineer for all costs & damages including legal fees & appellate fees resulting from deviations from this plan.
7. Any modifications or additions to this document will invalidate engineer's certification.
8. Except as expressly provided herein, no additional certifications or affirmations are intended.

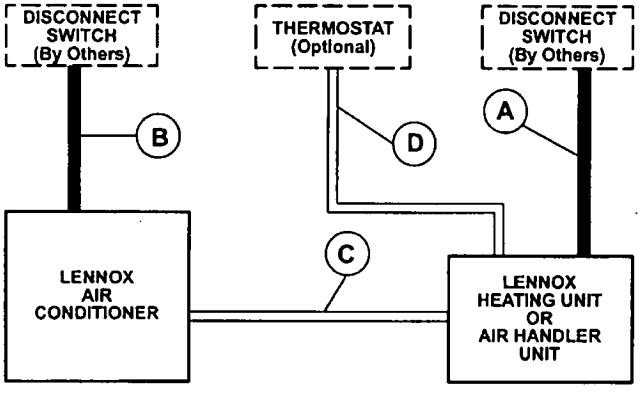
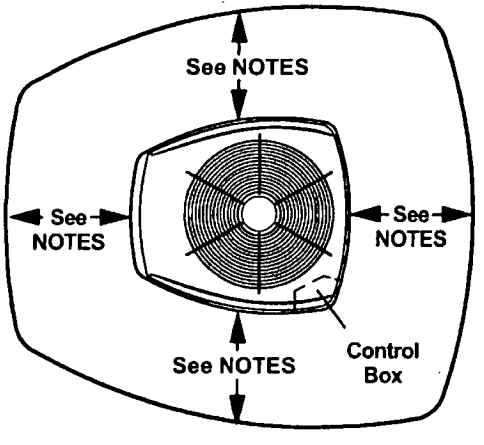
[1] Tested according to AHRI Standard 270-2008 test conditions.

FIELD WIRING



A - Two Wire Power (not furnished)
B - Two Power (not furnished). See Electrical Data
C - Four Wire Low Voltage (not furnished). 18 ga. minimum
D - Six Wire Low Voltage (not furnished). 18 ga. minimum
All wiring must conform to NEC or CEC and local electrical codes.

INSTALLATION CLEARANCES - INCHES (MM)



NOTES:

Service clearance of 30 in. (762 mm) must be maintained on one of the sides adjacent to the control box.

Clearance to one of the other three sides must be 36 in. (914 mm)

Clearance to one of the remaining two sides may be 12 in. (305 mm) and the final side may be 6 in. (152 mm).

A clearance of 24 in. (610 mm) must be maintained between two units.

48 in. (1219 mm) clearance required on top of unit.

Ratings AHRI Certified to AHRI Standard 210/240 (with 25 ft. of connecting refrigerant lines); 95°F outdoor air temperature, 80°F db / 67°F wb entering evaporator air.

All ratings include the use of a blower time delay relay (TDR). All Lennox variable-speed furnaces and Air Handlers have time delay capabilities. Other Furnaces and Air Handlers may require an optional time delay relay (**58M81**) for field installation. See furnace or air handler specifications to determine if relay is needed.

Also see Expansion Valve Kit Usage Table.

AIR HANDLERS

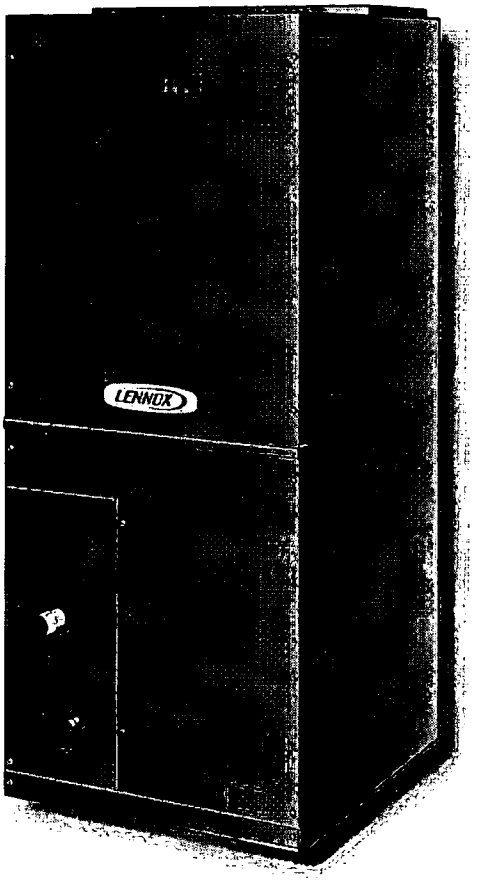
CBX25UHV

MERIT® Series

R-410A - Upflow / Horizontal - Variable Speed

PRODUCT SPECIFICATIONS

Bulletin No. 210611
March 2015
Supersedes November 2014



Nominal Capacity - 1.5 to 5 Tons
Optional Electric Heat - 2.5 to 20 kW

MODEL NUMBER IDENTIFICATION

CB X 25 UH V - 030 - 230 - 01

- **Unit Type**: CB = Air Handler
- **Refrigerant Type**: X = R-410A
- **Series**: 25
- **Configuration**: UH = Upflow/Horizontal
- **Blower Motor**: V = Variable Speed
- **Nominal Cooling Capacity**: 030
  - 018 = 1.5 tons
  - 024 = 2 tons
  - 030 = 2.5 tons
  - 036 = 3 tons
  - 042 = 3.5 tons
  - 048 = 4 tons
  - 060 = 5 tons
- **Voltage**: 230 = 208/230V-1 phase-60hz
- **Minor Revision Number**: 01

BLOWER DATA

NORM	1340	1520	1730	2100	950	1100	1230	1520	1325	1530	1740	2150
–	1210	1390	1570	1915	850	1000	1110	1375	1200	1380	1600	1950

NOTES - The effect of static pressure, filter and electric heater resistance is included in the air volumes listed.
First stage cooling air volume is 70% of COOL speed setting. Continuous blower speed is approximately 50% of COOL speed setting.
Lennox Harmony III™ Zoning System applications - minimum blower speed is 450 cfm.

NOTE - Circuit 1 Minimum Circuit Ampacity includes the Blower Motor Full Load Amps.

[1] Electric heater capacity only - does not include additional blower motor heat capacity.

[2] Refer to National or Canadian Electrical Code manual to determine wire, fuse and disconnect size requirements. Use wires suitable for at least 167°F.

[3] HACR type breaker or fuse.

[4] **Bold indicates that the circuit breaker on "CB" circuit breaker models must be replaced with size shown. See table on page 17.**
